No. 5907 F.—The 29th November 1927.—In exercise of the power conferred by sub-rule (1) of rule 4 of the Civil Services (Governors' Provinces) Delegation Rules, 1926, published with the Government of India, Home Department, notification No. F. 178-9-II-24, dated the 1st April 1926, the Governor in Council and the Governor acting with his Ministers are pleased to make the following rules regulating the pensions of provincial and subordinate services and of officers holding special posts. They shall be deemed to have come into force with effect from the 9th March 1926 :—

Rules.

1. The service of an officer does not qualify for pension unless it conforms to the following three conditions :—

Firstly, the service must be under Government.

Secondly, the employment must be substantive and permanent.

Thirdly, the service must be paid by Government.

Provided that Government may, even though either or both of conditions (1) and (2) above are not fulfilled,—

(i) declare that any specified kind of service rendered in a non-gazetted capacity shall qualify for pension ; and

(ii) in individual cases, and subject to such conditions as they may think fit to impose in each case, allow service rendered by an officer to count for pension.

2. All existing rules and orders relating to the pensions of provincial and subordinate services, and of officers holding special posts, in so far as they are not inconsistent with rule 1, are hereby confirmed.

No. 5941 F.—The 30th November 1927.—In exercise of the power conferred by rule 9 of the Bengal Passages Rules, 1927, the Governor acting with his Ministers is pleased to add the following posts to those included in Schedule II to the said rules, namely :—

Rules for the Safe Custody of Non-treasury Padlocks and Keys and Duplicate Keys of such Locks.

1. Every padlock shall have a number impressed upon it, or attached to it by a metal or other label, and the same number shall be impressed on or attached to each key belonging to it, and no two padlocks in the same district shall be of the same number.

2. (a) All spare padlocks with their keys, and all duplicate keys of locks in use in offices situated at the headquarters of a district, subdivisional offices and other outlying offices in the district shall be sent to the Treasury Officer for safe custody.

(b) All padlocks and keys sent to the Treasury Officer for safe custody shall be sent with a forwarding letter mentioning the numbers of the padlocks and the keys so sent.

(c) The Treasury Officer shall send receipts direct to the officers concerned after the necessary entries have been made in his register.

3. A register of all padlocks and keys received for safe custody by the Treasury Officer shall be maintained in the following form:—

Date of receipt.	From whom received.	Number borne by padlocks and keys.	Number of duplicate keys received.	Name of office using the padlock.	Initials of the Treasury Officer receiving the key.	Date of removal of any duplicate key.	Number and date of order sanctioning the removal.	Initial of the Treasury Officer removing the key.	Remarks.
1	2	3	4	5	6	7	8	9	10

4. The padlocks and keys received by the Treasury Officer shall be kept in a special box in the treasury in the custody of that officer.

5. (a) At least once every three months, and whenever the charge of the treasury is transferred, all padlocks with their keys and all duplicate keys in the custody of the Treasury Officer shall be examined by him, and a certificate shall be signed that they have been found to be correct.

(b) The Collector shall examine and verify the entries once a year during his annual inspection.

6. (a) If any key in use is lost, the lock shall be opened, unless otherwise directed by the head of the office, with a duplicate key obtained from the Treasury Officer, and the lock and the key shall then be withdrawn from use.

(b) A duplicate key shall be issued by the Treasury Officer when the requisition for it is signed by the head of the office concerned.

(c) No local mechanic shall be allowed to repair a padlock except under the personal supervision of the head of the office. Where such local supervision is not possible, or where there is doubt as to the safety of the operation of repair, a new lock and key shall be brought into use. A new key shall in no case be made locally.

* *N.B.*—In these rules for districts in which there is no treasury the word "Nazarat" shall be substituted for the word "Treasury" and the expression "Nazarat Deputy Collector" for the expression "Treasury Officer."

Date of effect—30th November 1927.

No. 16197A.—Mr. Pashupati Basu, Subordinate Judge of Dinajpur, is vested with the powers of a Judge of a Court of Small Causes for the trial of suits cognizable by such a Court up to the value of Rs. 500 within the local limits of the Sadar munsifi of Dinajpur.

ENGLISH DEPARTMENT—CIVIL.

The 29th November 1927.

No. 16325G.--The following amendments made by the High Court of Judicature at Fort William in Bengal in the rules relating to legal practitioners, contained in Chapter XIV of the "Rules of the High Court, Calcutta, Appellate Side, 1922" are published for general information. *The amendments will take effect from the 1st of January 1928.*

I. *Substitute* the following for sub-rule (2) of Rule 1, Chapter XIV, at page 135 :—

"(2) Except as mentioned in sub-rules (19) and (23) to this rule, every person, before being admitted as a Vakil in the High Court, shall *either* serve a regular clerkship to some Vakil of the High Court for the full period of two years, *or* shall serve a regular clerkship to some Vakil of the High Court for a period of six months and shall read in the Chambers of an Advocate enrolled as such, under Chapter I(a) of the Rules of the High Court, Original Side, 1914, for a further period of eighteen months, unless the Court, for special reason, think fit to remit any portion of the periods mentioned above :

Provided that the Vakil shall be approved by the Court before the contract is entered into in writing, pursuant to the rules hereinafter contained ;

Provided also that permission shall not be granted under this rule to any Vakil to entertain more than three articled clerks and to any Advocate more than three pupils, at one time."

II. *Insert* the following after sub-rule (3) :—

"Similarly the reading need not be in the Chambers of one and the same Advocate, but may be in the Chambers of different Advocates, provided that the notice mentioned in sub-rule [13(b)] is given in each case of change of Chambers, within the time prescribed by sub-rule [13(c)]. The reasons for such a change should be adduced and the approval thereto of the last Advocate should be signified, stating the actual period for which the study was made in his Chambers."

III. In sub-rule (11)—

(i) In clause (a) *insert* the words "or reading in the Chambers of an Advocate" after the word "Vakil" in line 2; the words "or study" after the word "service" in line 5; and the words "or the Advocate, as the case may be," after the word "Vakil" in line 6.

(ii) In clause (b) *insert* the words "or reading in the Chambers of an Advocate" after the word "assigned" in line 1, and the words "or the Advocate, as the case may be," after the word "Vakil" in line 5.

IV. *Renumber* sub-rule (12) as sub-rule [12(a)].

V. *Insert* the following after sub-rule [12(a)] :—

"(b) Where a person who applies to be admitted as a Vakil in the High Court has served as a clerk under a Vakil of the High Court under articles of clerkship for a period of six months and has also read in the Chambers of an Advocate or Advocates enrolled as such under Chapter I (a) of the Rules of the High Court, Original Side, 1914, for a further period of eighteen months, shall, besides complying with the provisions of the preceding sub-rule, also produce a certificate from the Advocate or Advocates in whose Chambers he shall have read, in the form given in Schedule F hereunto annexed."

VI. In sub-rule (13) *substitute* the word "sub-rule" for the word "rule" occurring in lines 3 and 5.

VII. *Renumber* sub-rule (13) as sub-rule [13(a)] and *insert* the following as sub-rules (13A) and (13B) :—

"[13(b)] An Advocate taking a pupil under sub-rule (2) of this Chapter shall give notice of that fact to the Registrar on the Appellate Side in the form given in Schedule E hereunto annexed, which shall also be signed by the pupil.

[13(c)] The notice referred to in the last preceding sub-rule shall be filed with the Registrar within seven days from the date of admission of the pupil."

VIII. In sub-rule (15)—

(i) *Insert* the words "or study in Chambers" after the word "service" in line 4.

(ii) *Insert* the words "or in whose Chambers he shall have read" after the word "clerkship" in line 10.

(iii) *Insert* a comma and the word "study" after the word "service" in line 12.

IX. In sub-rule (16)—

(i) *Cancel* the words "articles aforesaid" in line 4, and *substitute* therefor the words "aforesaid articles or study in Chambers, as the case may be."

X. *Insert* the following as Schedule E, at page 141 :—

"Schedule E.

No. 4978M.—The 7th December 1927.—In exercise of the power conferred by section 27 of the Bengal Municipal Act, 1884 (Bengal Act III of 1884), the Government of Bengal (Ministry of Local Self-Government) are pleased to appoint Maulvi Yakub Hossain to be a Commissioner of the Suri Municipality, in the district of Birbhum, *vice* Maulvi Sajjad Ali Karim, deceased.

Minister-in-charge: The Hon'ble Sir P. C. Mitter, Kt., C.I.E.

No. 5008L.S.-G.—The 9th December 1927.—The following draft of an amendment which, in exercise of the power conferred by clause (1) of section 138 of the Bengal Local Self-Government Act of 1885 (Bengal Act III of 1885), the Government of Bengal (Ministry of Local Self-Government) intend to make in the rules published with notification No. 2158 L.S.-G., dated the 5th September 1918, as subsequently amended, is published for the information of persons affected thereby.

2. The draft will be taken into consideration on or after the 1st February 1928, and any objection or suggestion received by the undersigned before that date will be duly considered:—

Draft amendment.

In rule 115, after sub-rule (1) add the following:—

“Provided that this rule shall not apply to District Engineers recruited after 1st April 1928, except in special cases, where the previous sanction of the Local Government shall be obtained.”

Minister-in-charge: The Hon'ble Sir P. C. Mitter, Kt., C.I.E.

No. 4805 L. S.-G.—The 28th November 1927.—In exercise of the power conferred by section 5 of the Bengal Village Self-Government Act, 1919 (Bengal Act V of 1919), and after considering the views of the Pabna District Board and the Serajganj Local Board, the Government of Bengal (Ministry of Local Self-Government) are pleased to direct that each of the following local areas in thanas Serajganj, Ullapara, Shazadpur, Raiganj, Belkuchi, Taras, Chowhali Kamarkhanda and Kazipur in the Serajganj subdivision of the Pabna district shall be declared a union for the purposes of the Act.

2. In exercise of the power conferred by sub-section (1) of section 6 of the said Act, the Government of Bengal (Ministry of Local Self-Government) are pleased to establish union boards for each of the unions hereby declared and to fix nine as the number of members of each union board.

3. In exercise of the power conferred by sub-section (3) of section 6 of the said Act, the Government of Bengal (Ministry of Local Self-Government) are pleased to direct that one-third of the number of members of each union board shall be appointed by the District Magistrate on the grounds that the electors are inexperienced and that such appointment is necessary for the due representation of minorities:—

Minister-in-charge: The Hon'ble Sir P. C. Mitter, Kt., C.I.E.

No. 4947 L.S.-G.—The 3rd December 1927.—In exercise of the power conferred by section 5 of the Bengal Village Self-Government Act, 1919 (Bengal Act V of 1919) and after consideration of the views of the 24-Parganas District Board and the Alipore Sadar Local Board, the Government of Bengal (Ministry of Local Self-Government) are pleased to direct that each of the following local areas in thanas Tollygunge and Baruipur in the Sadar subdivision in the district of the 24-Parganas shall be declared a union for the purposes of the Act.

2. In exercise of the power conferred by sub-section (1) of section 6 of the said Act, the Government of Bengal (Ministry of Local Self-Government) are pleased to establish Union Boards for each of the unions hereby declared and to fix nine as the number of members of each Union Board.

3. In exercise of the power conferred by sub-section (3) of section 6 of the said Act, the Government of Bengal (Ministry of Local Self-Government) are pleased to direct that one-third of the number of members of each Union Board shall be appointed by the District Magistrate on the grounds that the electors are inexperienced and that such appointment is necessary for the due representation of the minorities.

Minister-in-charge: The Hon'ble Nawab Mushtarruf Hossain, Khan Bahadur.

No. 4734 Edn.—The 10th December 1927.—The following rules, which will come into operation with effect from the 1st January 1928, are published for general information:—

Rules of the Government Provident Fund Scheme for Teachers in Non-Pensionable Service.

1. Scope of the Scheme.—The scheme shall be applicable to the following classes of employes:—

- (a) Whole-time teachers of schools for Europeans and Anglo-Indians.
- (b) Whole-time teachers of secondary schools for Indians, whether managed by District Boards, Municipalities or private persons.

2. Nature of the Scheme.—It will be optional for any institution belonging to one or other of the classes specified in rule 3 to elect to come under these rules, but no such institution and no teacher of any such institution, shall be allowed to come under these rules, until such time as all the teachers of such institution other than those declared inadmissible under rule 4 have agreed in writing to join the Government provident fund scheme in accordance with these rules. When a school has been permitted to come under these rules, subscriptions by the teachers other than those excluded under rule 4 or exempted under rule 4A shall be compulsory on existing and future members of the teaching staff. The number of institutions admitted under these rules will be limited by the amount of the annual provision for grants-in-aid made from time to time by the Government.

3. Eligibility of Institutions.—The following classes of institutions may exercise the option to join the scheme:—

- (a) Secondary schools in Bengal recognised by the University of Calcutta for the purpose of presenting candidates for the Matriculation Examination.
- (b) Secondary schools* recognised by the Dacca Board of Secondary and Intermediate Education.
- (c) Secondary schools* recognised by the Department of Education, Bengal.
- (d) Schools recognised under the European Schools Code.

4. Persons not admissible.—The scheme shall not be extended to—

- (a) Persons rendering pensionable service whether under Government, under local bodies, or in privately managed institutions.
- (b) Law lecturers practising as lawyers.
- (c) Teachers working in an honorary, or mainly honorary, capacity, *e.g.*, those belonging to a religious order.
- (d) Teachers for whom a separate provident fund is maintained.
- (e) Persons working in educational institutions other than as *bond fide* teachers.
- (f) Persons holding temporary posts.
- (g) Teachers below 20 or over 55 years of age*.

A person already subscribing to another provident fund maintained in connection with the institution in which he is working shall not be allowed to subscribe to this scheme, but an existing scheme may be converted into this scheme with the sanction of the Director of Public Instruction. The managers of schools which have provident funds of their own, and desire such conversion, shall apply through the controlling authority specified in rule 7 to the Director of Public Instruction to have their provident funds merged in the Government provident fund, and the Director may sanction such applications. The managers shall thereupon wind up their funds and deposit in the post office savings bank the amount standing to the credit of each subscriber. Such amounts shall thereupon become subject to these rules.

4A. Exemption.—The controlling authority mentioned in rule 7 may exempt from the operation of these rules any teacher who holds

*N.B.—(i) "Schools" includes Junior and Senior Madrasahs and also schools and madrasahs to which intermediate classes have been added.
(ii) The term "recognised" includes schools which have been provisionally recognised.

* A teacher once admitted may remain in the scheme till the age of 60.

a policy in a life assurance company and pays thereon as premium an amount equal to or in excess of the monthly sum payable by him as subscription to the Government provident fund. Such exemption will be granted only so long as the said premium continues to be paid.

5. Amount of Subscription.—The amount of subscription shall be a percentage of $6\frac{1}{4}$ of a subscriber's pay, except in the case of a subscriber whose pay is less than Rs. 25 a month, in which case it shall, if he so desires, not exceed Re. 1 a month. In the case of subscribers who pay at the rate of $6\frac{1}{4}$ per cent. subscription will be calculated to the nearest anna. Voluntary subscriptions in excess of the regular amount shall not be admissible. Subscriptions during leave with or without allowance other than casual leave or during suspension shall be optional on the part of the subscriber.

When a subscriber is on reduced pay on account of absence on leave or for other causes, his subscription, if paid, as well as the contribution of the managers, shall be reckoned on the substantive pay of his post. No Government grant will be made in such cases for any period of leave in excess of one month in any one year, except that, in cases where a subscriber has not been on leave other than casual leave during a consecutive series of years, a Government grant will be made in respect of one month for each of these years up to a maximum of four at any one time.

Pay for the purpose of reckoning subscriptions is substantive pay, and excludes recompense for special occasional services, or acting or personal allowances.

The managers shall communicate to the controlling authority all changes affecting the pay of a subscriber under these rules.

6. Contribution by the managers assisted by Government.—The managers shall contribute a sum equal to the teacher's subscription. To assist the managers in making this contribution a monthly grant equal to one-half of this contribution will be sanctioned to the institution by the Education Department, provided the controlling authority specified in rule 7 is satisfied that the management of the institution can raise the other half from funds not derived from Government. The managers' contribution with the subscription of the teacher will be paid into the subscriber's account every month.

Example—A teacher's subscription to the fund amounts to Rs. 5 a month. The managers will contribute a like amount and place the total sum of Rs. 10 to the credit of the teacher's account in the provident fund. Government will then increase the normal grant-in-aid to the school by Rs. 2-8 a month or make a new grant of Rs. 2-8 in respect of this subscriber.

In no case shall the adoption of these rules involve any reduction of the actual monthly emoluments received by subscribers from those existing at the time of the adoption of these rules by the school, other than by the amount of the monthly subscription of the subscriber.

It is left to the managers concerned to decide how their share of the contribution shall be provided, but in the case of institutions already aided by Government, except where the monthly credit balance of such an institution after meeting all charges is already sufficient to cover the cost of its contributions under these rules, the extra amount required for the purpose shall come out of a special levy, i.e., a special increase of the fees for the purpose, or from other additional revenue from private sources. This condition, however, shall not apply to aided schools which already maintain a provident fund to which the managers and the teachers each contribute equal amounts of not less than $6\frac{1}{4}$ per cent. of salary, and such schools shall be permitted by the Director to come under these rules without any such special increase in income from private sources. In no case shall that half of the managers' contribution which has to be found from their own resources be derived from Government in the shape of additional grant or in any other manner whatsoever, nor shall it be obtained by a reduction in the total scale of expenditure sanctioned by the Inspector of Schools as a condition of the grant-in-aid.

7. Control of the fund.—Subject to such rules as may be framed by Government from time to time, the controlling authority shall be—

- (a) The Divisional Inspector or Circle Inspectress of Schools in the case of secondary schools for Indians.
- (b) The Inspector of European Schools, Bengal, in the case of European schools.

- (c) The Chairman of the Dacca Board of Secondary and Intermediate Education in the case of schools controlled by the Board.

NOTE.—The controlling authority referred to in these rules is the appropriate authority as defined in this rule.

3. Management of the fund.—(a) The fund shall be managed by means of the post office savings bank system. The subscriber's subscription, together with the contribution of the managers, shall be deposited in a post office savings bank. The following procedure shall be adopted.

(b) The post office shall open individual accounts for each of the subscribers to the provident fund. The managers of the school shall arrange to have subscriptions to the fund due from the subscribers deducted from their salaries when they are disbursed each month and shall remit these amounts, together with the managers' contributions, to the particular post office at which the accounts stand open, accompanied by—

- (ii) a list in the form given below showing in detail the amount to be credited to each account and the total amount of the deposits and refunds:—

(Name of Institution.)

Month of.....19 ..

Account number as in the pass book.	Name of subscriber.	Monthly pay of subscriber.	Monthly subscription of teacher.	Contribution by the managers.	Amount of advance refunded.	Total.
		Rs.	Rs.	Rs.	Rs.	Rs.
				•	•	
	Total ..					

(c) The money received in the post office shall be credited to the different accounts in accordance with the entries in the list and the postmaster, after satisfying himself that this has been done and that the amount of the deposit has been correctly entered in each pass book, shall sign the list, stamp it with the post office date stamp and return it with the pass books to the managers of the institutions from which they were received. The managers shall compare the entries made in the pass books with the entries in the list to see that the former are correct. Any error that may be detected shall be brought at once to the notice of the postmaster.

(d) So far as the post office is concerned the list need not be in duplicate as the deposits will be entered in the usual course in the Post Office Savings Bank Ledger and Journals which will furnish a complete record of the transaction. The managers of the school shall furnish a true copy of the list to the controlling authority. The controlling authority during his periodical visits to the schools shall audit the monthly list of payments into the post office savings bank with reference to the original pay bills or acquittance rolls and satisfy himself that subscriptions and contributions are not received in excess or defect from the subscribers or managers.

(e) Deposits will ordinarily be made monthly before the 15th of the month. In exceptional circumstances, however, deposits may be made at any time and as often as desirable, so that if owing to the temporary absence of a subscriber or for any other cause the subscription of and the contribution on behalf of one or more subscribers cannot be deposited at the same time as the other deposits, they can be deposited singly or collectively at a later date, a separate list being

sent along with the pass book in the manner already described. The provisions of sub-sections (c) and (d) will apply to such supplementary lists.

(f) When a pass book is used up, and a fresh pass book issued, a subscriber should apply to the postal authorities, through the managers of his institution, for the return of his used up pass book and it should be forwarded to the controlling authority when received for record and production when the account is finally closed.

(g) When a subscriber leaves one school and obtains employment in another and the Government provident fund scheme applies to both schools, the controlling authority of the school which he has left shall sanction the transfer of his account less any deductions permissible under rule 11 to the post office at which the accounts of the school which he has joined stand open. Any deductions made in accordance with rule 11 shall be credited to Government in the Treasury or to the management in accordance with the provisions of rule 11.

The controlling authority shall maintain a register in the form prescribed in Appendix C of the transfer of accounts sanctioned by him. The managers of a school shall furnish every subscriber who leaves the school with a certificate, which shall bear the countersignature of the controlling authority, specifying the period for which subscriptions to the fund were made by the subscriber and contributions by the management on his behalf.

(h) If a teacher in an institution with its own provident fund joins an institution to which the Government scheme applies, the amount at his credit may at his option, with the approval of the controlling authority, be placed in the fund to his credit in such new institution. In the event of the resignation of a subscriber from an institution to which the Government provident fund scheme applies, and his acceptance of a post in a school possessing its own fund, such sum as may be to the credit of the subscriber may, by private arrangement between the subscriber and his new school managers, be made over to the provident fund of the new school; but Government can accept no responsibility in the matter, and the provisions of rule 11 (f) will apply to such cases.

(i) Subscribers under these rules on whose behalf accounts are opened under the provisions of this scheme are not deprived of their right to open ordinary private accounts in the post office savings bank. The limits to annual and maximum deposits and to the amount on which interest may be calculated in the case of ordinary accounts in the post office savings bank do not apply to accounts opened under these rules. The officer to whom certain specified powers may be delegated under section 45A (c) of the Post Office Rules for Teachers' Provident Fund accounts is, for the purpose of the present rules, the appropriate controlling authority specified in rule 7.

(j) A register shall be maintained by all schools which join the Government provident fund in the form prescribed in Appendix C.

(k) The savings bank account shall be closed at the time the depositor retires or is permitted to withdraw in accordance with these rules. Whenever a subscriber wishes to withdraw from the fund he shall submit an application to the controlling authority, through the managers of the school, giving his reasons therefor. In cases where the controlling authority decides that the subscriber is entitled to the full sum at credit, that authority shall sanction the closure of the account and issue a certificate to the effect that the subscriber has quitted the fund in circumstances which give him a title to the full amount standing to his credit in the pass book. The postmaster shall thereupon close the account in the Savings Bank pass book, and, on receipt of an application for withdrawal signed by the subscriber and endorsed in favour of the school clerk or peon or other person authorised by the managers of the school, pay the latter on behalf of the subscriber the total amount standing to his credit. The managers of the school shall, after receiving the amount from the post office, disburse it to the subscriber concerned on acquittance rolls which shall be filed in the school, an attested copy being forwarded immediately to the controlling authority for information. In cases where the controlling authority decides that a subscriber who has applied for permission to withdraw from the fund is entitled to less than the total sum at his credit, he shall issue a certificate accordingly, sanction the closure of the account, and instruct the postmaster to pay the managers of the school the sum declared by him to be due to the subscriber and the postmaster

shall, on receipt of an application for withdrawal signed by the subscriber and endorsed in favour of the clerk or peon or other person authorised by the managers of the school, pay the latter the sum due to the subscriber's credit. The managers shall, after receiving the amount, pay the subscriber the amount due to him, as decided by the controlling authority. All applications to the postmaster to close the account must be supported by the controlling authority's order in original, which should specify the actual amount allowed to be withdrawn. The balance of the account, forfeited by the subscriber under the orders of the controlling authority, shall be drawn under the order of the controlling authority by the managers, less the sum due to be paid into the Treasury under the note to rule 11, which shall be drawn by the controlling authority and credited to the Treasury. The managers, on receipt of their share of the balance, shall credit it to the school funds or to such school fund as they shall think fit, and thereupon send a formal acknowledgment of receipt to the controlling authority, who will file the receipt in his office. The controlling authority shall maintain a register in the form prescribed in Appendix D of closures of accounts sanctioned by him.

The procedure prescribed in this clause shall apply *mutatis mutandis* to payments made on the sanction of the controlling authority on the death of the subscriber. The controlling authority shall maintain a register in the form prescribed in Appendix F for these payments.

(l) The pass books issued by the post offices on behalf of the subscribers shall be in the custody of the managers of the school, who will annually appoint one of their members to keep custody of the pass books and act on their behalf in the management of the fund. The name of the manager selected shall be notified annually to the controlling authority as also shall all changes immediately upon their taking place. Every subscriber shall, once in each official year, be permitted to look into his account to satisfy himself as to its correctness and shall sign a certificate in token of his acceptance thereof. The certificates obtained under this rule shall be forwarded to the controlling authority for check and record in his office.

(m) If the managers of a school allow their own contribution or the subscription of a subscriber employed by them who has joined the fund to fall into arrears, the controlling authority may take such steps to enforce payment as he may deem necessary and are within his power. Failing all other measures, the fund shall be closed and the school excluded from the scheme.

(n) When a school belonging to the fund ceases to exist, or is excluded from or leaves the fund, steps shall be taken to close, or in cases covered by clause (g) of this rule, to transfer, each individual account. The provisions of rule 11(e) shall be regarded as applying to all cases which are not capable of being brought under clause (g) above. Schools excluded from or leaving the fund shall be ineligible for readmission for a period of five years. When for any reasons the controlling authority considers it essential in the interests of the subscribers, he shall have power to direct that the postmaster pay the sum due on all or any of the accounts to such person or persons other than the managers as he may select for distribution in accordance with the rules of the fund.

(o) Every subscriber on joining the fund shall sign a certificate in the form given in Appendix A in token of acceptance of the rules. These certificates shall be filed with the managers of the institutions concerned.

9. The Registers to be kept by the managers of Institutions.—The following registers shall be maintained by managers of institutions, the employés of which contribute to the fund:—

- (a) A card catalogue register in the form prescribed in Appendix B showing the names of subscribers to the fund.
- (b) A register in the form prescribed in Appendix E showing the advances sanctioned from the fund and their refund.
- (c) A register in the form prescribed in Appendix C showing the transfer of accounts sanctioned by the controlling authority of subscribers who have left the school, and the certificates issued to them of the amounts due to them in the fund.
- (d) A register in the form prescribed in Appendix D showing the names of the subscribers whose accounts have been closed.
- (e) A register in the form prescribed in Appendix F showing the payments made on the death of a subscriber.

10. Interest to the depositor.—Interest shall be allowed on all deposits at such rates as may from time to time be determined for deposits in post office savings banks.

The deposits in the post office savings bank account of each subscriber may, as they accumulate, be invested through the post office in short-term loans or other securities of the Government of India, in the manner prescribed for such investments in the Post Office Savings Bank Rules. The securities in such cases shall be left in the custody of the Accountant-General, Posts and Telegraphs, who will, under rule 49 of the Savings Bank Rules, draw the interest due and advise the post office concerned to credit the amount in the investor's account.

When any subscriber has conscientious or religious objections to the receipt of interest, the manager will notify the post office at which the account stands open and interest will thereupon not be credited.

11. Withdrawal of Deposits.—The total sum at the credit of a subscriber shall be payable to him on his leaving the service of the managers of the institution, in which he is employed, subject to the right of the managers, with the sanction of the controlling authority, to deduct therefrom any sum due to the managers, provided that the total sum deducted shall not exceed the total of the managers' contributions credited to his account and provided that—

- (a) A subscriber who resigns his post within less than two years after his admission to these rules will receive, subject to the provisions of clause (f) of this rule, his own subscriptions and the complete accrued interest of the fund, and with the sanction of the controlling authority, given for good reason, the contributions of the management.
- (b) A subscriber who resigns his post in a school admitted to the Government provident fund scheme, within less than two years of his appointment to that post, will receive, subject to the provisions of clause (f) of this rule, his own subscriptions, the complete accrued interest of the fund, and the managers' contributions, if any, prior to his appointment to that post, and with the sanction of the controlling authority, given for good reasons on the proposal of the managers, the contributions of the managers subsequent to his appointment to the post above mentioned. The managers shall have full authority to decline to make the proposal in cases where less than two years' service has been given by the subscriber to their institution, though the managers are permitted to suggest that a shorter period of service than two years shall qualify for the managers' contributions, when service, though short, has been of value to the school.
- (c) If a subscriber is permanently disabled or invalided, he will ordinarily receive his subscriptions, the managers' contributions, and the whole of the accrued interest at whatever stage of his service he is disabled or invalided. The managers' contributions for the preceding two years may, with the sanction of the controlling authority, be withheld in a case where a subscriber has been incapacitated through his own fault.
- (d) If a subscriber is dismissed or removed from service on grounds regarded as reasonable by the controlling authority, the managers' contributions for a period not exceeding two years may be withheld at the discretion of the controlling authority. Such a subscriber will receive his own subscriptions, the balance of the managers' contributions and the complete accrued interest of the fund.
- (e) If the services of a subscriber are dispensed with for no fault of his own, he shall, with the sanction of the controlling authority, receive the total sum to his credit, including the managers' contributions and the interest accrued, or if he seeks re-employment in a school which has been admitted to the fund, may continue to participate in the scheme without subscription until the date of re-employment, provided the period of unemployment does not exceed one year.
- (f) If a subscriber resigns his post in an institution to which these rules apply for the specific purpose of accepting a post to which he has been appointed in an institution which has not been admitted to the Government provident fund scheme, or which has a provident fund not working under these

rules, he may, with the sanction of the controlling authority, receive the sum found to be due to him under these rules, but if he resigns his post without having been appointed to any other post, he shall continue to participate in the scheme without subscription or contribution, until he obtains employment either in an institution working under these rules, in which case his account shall be transferred to such institution subject to the provisions of rule 8 (g), or in an institution not working under these rules, in which case his account shall be closed and he shall be entitled to receive the sum found due to him under these rules; provided that such participation without subscription or contribution shall not extend beyond one year, at the close of which period the account shall be closed and the subscriber shall be entitled to receive the sum found due to him under these rules; and provided also that if the subscriber is fifty or more years of age, and the controlling authority is satisfied that he is retiring from the teaching profession, he shall sanction the payment to him of the amount due in accordance with these rules, without postponement.

N.B.—In all cases where the contributions of the Managers are withheld under Clauses (a), (b), (c) and (d) of this rule, half the amount withheld shall be paid under the orders of the controlling authority to the managers and half shall be paid by the controlling authority to the credit of Government in the Treasury.

12. Payment on the death of a subscriber.—(a) On the death of any subscriber, the managers shall, with the sanction of the controlling authority, pay to the subscriber's nominee, or person producing probate or letters of administration or succession certificate, as laid down in clauses (c), (d) and (e) of this rule, the total sum of money that was at the credit of the subscriber, subject to the right of the managers, with the sanction of the controlling authority to deduct therefrom any sum or sums due to the managers, provided that the total amount of such deductions shall not exceed the total of the managers' contributions credited to the account of the subscriber.

(b) Every subscriber shall be permitted to nominate a dependant or dependants to whom the whole or part of the amount standing at his credit shall be payable in the event of his death. But if the nominee is a minor, the subscriber shall, at the time of nomination, also appoint a person of full age to whom, in the event of the subscriber dying before the minor nominee attains his majority, the amount standing at the subscriber's credit is to be paid on behalf of the minor nominee.

(c) All nominations must be in writing signed by the subscriber and attested by two witnesses and must be sent to the managers. The nominee named in any such written nomination received by the managers shall be and remain fully entitled to receive and give discharge for such amount as the subscriber has nominated him to receive from the sum at his credit until the nominee's decease, or until his nomination has been modified or revoked as hereinafter mentioned. A nomination once made in writing and received by the managers as aforesaid can only be modified or revoked when a modified nomination in writing, or the nomination in writing of a fresh nominee, or the complete cancellation of a previous nomination or nominations under the hand of the subscriber and attested by two witnesses, has been made and duly received by the managers.

(d) In case any subscriber shall die and at his death has not nominated, or has failed in the case of a minor nominee or nominees duly to appoint a person or persons of full age, and any moneys or the balance of any moneys not disposed of by nomination does not exceed Rs. 5,000, inclusive of interest, standing at his credit, and probate of will or letters of administration or succession certificates be not produced to the managers, or if notice in writing of the existence of a will and intention to prove the same, or to take out letters of administration or to obtain a succession certificate, be not given to the managers within the period of one month from the death of such subscriber, or if such notice be given but such will be not proved, or letters of administration be not taken out or succession certificate obtained, and the probate or letters of administration or succession certificate (as the case may be) produced to the managers within the period of six months from the death of the subscriber, the managers, after the period of one or six months, as the case may be, may, with the sanction of the controlling authority, pay such money to any person appearing to them to be entitled to receive them according to the Provident Funds Act No. XIX of 1925.

(e) In case any subscriber shall die, and, at his death, has not nominated, or has failed in the case of a minor nominee or nominees duly to appoint a person or persons of full age, and any moneys or the balance of any moneys not disposed of by nominations exceed Rs. 5,000, such money shall be paid to the executor or administrator only on the production to the managers of the probate of the will or letters of administration or succession certificate of the estate or effects of such subscriber.

13. Withdrawal of advances.—(i) A proportion of the total deposit not exceeding four months' pay of a subscriber may, with the sanction of the controlling authority, be allowed to be withdrawn in cases of urgent necessity when the deposit has reached a sum of not less than one year's pay and the pecuniary circumstances of the subscriber are such that the indulgence is necessary. The following are cited as examples of occasions on which the grant of advances may be considered:—

(a) To pay expenses incurred in connection with the illness of a subscriber or of a member of his family.

(b) To pay expenses in connection with marriages, funerals or ceremonies which by the religion of the subscriber it is incumbent upon him to perform and in connection with which it is obligatory that expenditure should be incurred.

Advances though not confined rigidly to the objects laid down in clauses (a) and (b) above will be made with due regard to the principle expressed in clause (i) of this rule as illustrated by the foregoing examples.

(ii) In determining the advance to be sanctioned, regard shall be paid to the amount lying at the credit of the subscriber. The amount of the advance should be a sum expressed in whole rupees, and should be so fixed as to allow of the monthly instalments fixed under rule 13 being also in whole rupees, the advance applied for being raised or reduced if necessary to enable the instalments to be so fixed.

(iii) When one advance has already been granted to a subscriber a subsequent advance shall not be granted to him, except for strong reasons to be recorded in writing by the controlling authority until at least twelve months have elapsed since the complete repayment of the last advance taken.

(iv) Applications for the withdrawal of any advance sanctioned shall be signed by the subscriber and duly endorsed in favour of the clerk or peon or other person authorised by the managers of the institution and must be supported by the controlling authority's sanction in the original. The manager of the institution shall, after receiving the money, disburse it to the subscriber concerned on acquittance rolls.

(v) Controlling authorities shall maintain a register in the form prescribed in Appendix E of advances sanctioned by them.

(vi) No fresh advance from the fund shall be sanctioned if there is any balance still to be refunded out of any advance already drawn from the fund.

14. Recovery of advances.—The following procedure for the recovery of advances shall be observed:—

(a) Advances shall be made recoverable, at the discretion of the controlling authority, in not less than twelve instalments or more than twenty-four. A subscriber may, however, at his option, make repayment subsequently in less than twelve instalments or may repay two or more instalments at the same time.

(b) Recoveries shall be made monthly, commencing from the first payment of a full month's salary after the advance is granted, but no recovery shall be made from a subscriber while he is on leave of any kind, except leave (or vacation) on full pay.

(c) The instalments shall be paid by compulsory deductions from salary and shall be in addition to the usual subscription.

(d) When an advance is repayable in 12 instalments, an additional instalment, representing interest, and equivalent to 4 per cent. of the amount of the advance shall be paid in the month following that in which the last instalment is paid. Similarly, two additional instalments representing interest, each equivalent to 4 per cent. of the total amount of the advance shall be paid when the advance is repayable in more than 12 instalments.

15. Protection of deposits.—(i) A deposit in the Government provident fund shall not in any way be capable of being assigned or charged and shall not be liable to attachment under any decree or order of any civil, revenue or criminal court in respect of any debt or liability incurred by the subscriber, and neither the Official Assignee nor any Receiver appointed under the Provincial Insolvency Act, 1920, shall be entitled to, or have any claim on, any such deposit.

(ii) Any sum standing to the credit of any subscriber to the fund at the time of his decease and payable under these rules to any dependant of the subscriber, or to such person as may be authorised by law to receive payment on his behalf, shall, subject to any deduction authorised by these rules and, save where the dependant is the widow or child of the subscriber, subject also to the rights of an assignee under an assignment made before the commencement of the Provident Funds Act, 1925 (XIX of 1925, as amended by Act XXVIII of 1925), vest in the dependant, and shall, subject as aforesaid, be free from any debt or other liability incurred by the deceased or incurred by the dependant before the death of the subscriber.

NOTE.—“Dependant” means any of the following relatives of a deceased subscriber to the Government provident fund, namely, a wife, husband, parent, child, minor brother, unmarried sister and a deceased son's widow and child, and, where no parent of the subscriber is alive, a paternal grand-parent.

16. The decision of the Director of Public Instruction on all questions arising out of these rules shall be final.

17. These rules may at any time be modified by the Local Government.

APPENDIX G.

Post office Rules relating to Teachers' Provident Fund Accounts.

45A. (a) Where a provident fund for teachers in non-pensionable service is established by a Local Government or Administration, individual accounts will be opened by the post office for all teachers who are permitted to contribute to such fund. The deposits in such accounts will comprise contributions made by the teachers as well as by the management of the schools where they are employed.

NOTE.—A teacher for whom a provident fund account has been opened will not be debarred from opening an ordinary private account in his own name.

(b) The annual limit of Rs. 750 and the maximum limit of Rs. 5,000 for deposits, as well as the maximum limit of Rs. 5,000 for calculation of interest, do not apply to accounts opened under this rule.

(c) The withdrawal of the balance or any part of it or the transfer of the account to another post office is not allowed without the sanction of the Local Government or Administration or the officer to whom such power may be delegated.

NOTE 1.—When the balance at credit of such an account lapses according to the rules of the fund, it may be withdrawn either wholly or in part by the Local Government or Administration or the officer to whom such power may be delegated. The Local Government or Administration or the officer to whom such power may be delegated may also withdraw the total balance at credit of such accounts of a school when the school ceases to exist and is thus excluded from the fund or when for any other reason such a course appears necessary.

NOTE 2.—In cases in which a teacher is debarred, in accordance with the rules of the fund from receiving the portion of the deposit which is made up of the contribution of the management, the manager will be allowed to withdraw the amount concerned under the orders of the Local Government or Administration or the officer to whom such power may be delegated.

(d) In the form of declaration which every teacher will be required to sign, the words "I further declare that I have no account opened by me on my own behalf at any post office savings bank" should be scored through in the case of accounts opened under this rule.

(e) The prohibition against the deposit and withdrawal of sums containing a fraction of an anna does not apply to accounts opened under this rule.

(f) Interest on an account opened under this rule ceases to accrue from the first day of the month in which the order for final withdrawal of the balance at credit is issued by the authority concerned.

APPENDIX H.

Act No. XIX of 1925.

[As amended by Acts No. 28 of 1925 and
No. VII of 1927.]

PASSED BY THE INDIAN LEGISLATURE.

*(Received the assent of the Governor-General on the
27th August, 1925.)*

*An Act to amend and consolidate the law relating to
Government and other Provident Funds.*

Whereas it is expedient to amend and consolidate the law relating to Government and other provident funds; It is hereby enacted as follows:—

Short title,
extent and
commencement.

1. (1) This Act may be called the Provident Funds Act, 1925.

(2) It extends to the whole of British India, including British Baluchistan.

(3) It shall come into force on such date as the Governor-General in Council may, by notification in the *Gazette of India*, appoint.

Definitions.

2. In this Act, unless there is anything repugnant in the subject or context,—

- (a) "compulsory deposit" means a subscription to, or deposit in, a provident fund which, under the rules of the fund, is not, until the happening of some specified contingency repayable on demand otherwise than for the purpose of the payment of premia in respect of a policy of life insurance, and includes any contribution credited in respect of any such subscription or deposit and any interest or increment which has accrued under the rules of the fund on any such subscription, deposit or contribution, and also any such subscription, deposit, contribution, interest or increment remaining to the credit of the subscriber or depositor after the happening of any such contingency;
- (b) "contribution" means any amount credited in a provident fund, by ¹[any authority administering the fund], by way of addition to, or otherwise in respect of, a subscription to, or deposit in, the fund; and "contributory provident fund" means a provident fund the rules of which provide for the crediting of contributions;
- (c) "dependant" means any of the following relatives of a deceased subscriber to, or a depositor in, a provident fund, namely, a wife, husband, parent, child, minor brother, unmarried sister and a deceased son's widow and child, and, where no parent of the subscriber or depositor is alive, a paternal grand-parent;
- (d) "Government provident fund" means a provident fund, other than a railway provident fund, constituted by the authority of the Government for any class or classes of its employees or of persons employed in educational institutions or employed by bodies existing solely for educational purposes;
- (e) "provident fund" means a fund in which subscriptions or deposits of any class or classes of employees are received and held on their individual accounts, and includes any contributions credited in respect of such subscriptions or deposits and any interest or increment accruing on such subscriptions, deposits or contributions under the rules of the Fund;
- (f) "Railway administration" means—
 - (i) any company administering a railway or tramway in British India either under a special Act of Parliament or of the Indian or a local Legislature, or under contract with the Secretary of State for India in Council, the Governor-General in Council or a Local Government, or
 - (ii) the manager of any railway or tramway administered by the Governor-General in Council or a Local Government, and includes, in any case referred to in sub-clause (i), the Governor-General in Council or the Local Government, as the case may be;
- (g) "railway provident fund" means a provident fund constituted by the authority of a railway administration for any class or classes of its employees.

¹These words were substituted for the words "the authority by which the fund has been constituted" by section 2 of the Provident Funds (Amendment) Act, 1925 (28 of 1925).

Protection of
compulsory
deposits.

3. (1) A compulsory deposit in any Government or railway provident fund shall not in any way be capable of being assigned or charged and shall not be liable to attachment under any decree or order of any civil, revenue or criminal court in respect of any debt or liability incurred by the subscriber or depositor, and neither the Official Assignee nor any receiver appointed under the Provincial Insolvency Act, 1920, shall be entitled to, or have any claim on, any such compulsory deposit.

V of 1920.

(2) Any sum standing to the credit of any subscriber to, or depositor in, any such fund at the time of his decease and payable under the rules of the fund to any dependant of the subscriber or depositor, or to such person as may be authorised by law to receive payment on his behalf, shall, subject to any deduction authorised by this Act and, save where the dependant is the widow or child of the subscriber or depositor, subject also to the rights of an assignee under an assignment made before the commencement of this Act, vest in the dependant, and shall, subject as aforesaid, be free from any debt or other liability incurred by the deceased or incurred by the dependant before the death of the subscriber or depositor.

Provisions
regarding
repayments.

4. (1) When under the rules of any Government or railway provident fund the sum standing to the credit of any subscriber or depositor, or the balance thereof after the making of any deduction authorised by this Act, has become payable, the officer whose duty it is to make the payment shall pay the sum or balance, as the case may be, to the subscriber or depositor, or, if he is dead, shall—

(a) if the sum or balance, or any part thereof, vests in a dependant under the provisions of section 3, pay the same to the dependant or to such person as may be authorised by law to receive payment on his behalf; or

(b) if the whole sum or balance, as the case may be, does not exceed five thousand rupees, pay the same, or any part thereof, which is not payable under clause (a), to any person nominated to receive it under the rules of the fund, or, if no person is so nominated, to any person appearing to him to be otherwise entitled to receive it; or

(c) in the case of any sum or balance, or any part thereof, which is not payable to any person under clause (a) or clause (b) pay the same—

(i) to any person nominated to receive it under the rules of the Fund, on production by such person of probate or letters of administration evidencing the grant to him of administration to the estate of the deceased or a certificate granted under the Succession Certificate Act, 1889, or under the Bombay Regulation, VIII of 1827, entitling the holder thereof to receive payment of such sum, balance or part, or

VII of
1889.

(ii) where no person is so nominated, to any person who produces such probate, letters or certificate:

Provided that, where the whole or any part of any sum standing to the credit of the subscriber or depositor has been assigned to any other person before the commencement of this Act, and notice in writing of the assignment has been received by the officer from the assignee, the officer shall, after making any deduction authorised by this Act and any payment due under

clause (a) to or on behalf of the widow or children of the subscriber or depositor—

- (i) if the subscriber or depositor or, if he is dead, the person to whom in the absence of any valid assignment the sum or balance would be payable under this sub-section gives his consent in writing, pay the sum or part or the balance thereof, as the case may be, to the assignee, or
- (ii) if such consent is not forthcoming, withhold payment of the sum, part or balance, as the case may be, pending a decision of a competent civil court as to the person entitled to receive it.

(2) The making of any payment authorised by sub-section (1) shall be a full discharge to the Government or the railway administration, as the case may be, from all liability in respect of so much of the sum standing to the credit of the subscriber or depositor as is equivalent to the amount so paid.

Rights of nominees.

5. (1) Subject to the provisions of this Act, but otherwise notwithstanding anything contained in any law for the time being in force or any disposition, whether testamentary or otherwise, by a subscriber to, or depositor in, a Government or railway provident fund of the sum standing to his credit in the fund, or of any part thereof, any nomination, duly made in accordance with the rules of the fund, which purports to confer upon any person the right to receive the whole or any part of such sum on the death of the subscriber or depositor, shall be deemed to confer such right absolutely, until such nomination is varied by another nomination made in like manner or is expressly cancelled by the subscriber or depositor by notice given in such manner and to such authority as is prescribed by those rules.

(2) Notwithstanding anything contained in the Succession Certificate Act, 1889, or the Bombay Regulation, VIII of 1827, any such person shall, on the death of the subscriber or depositor, be entitled to the grant of a certificate under that Act, or that Regulation, as the case may be, entitling him to receive payment of such sum or part, and such certificate shall not be deemed to be invalidated or superseded by any grant to any other person of probate or letters of administration to the estate of the deceased.

VII of 1889.

Power to make deductions.

6. When the sum standing to the credit of any subscriber or depositor in any Government or railway provident fund which is a contributory provident fund becomes payable, there may, if the authority ¹[specified in this behalf in the rules of the fund] so directs, be deducted therefrom and paid to ²[Government or the railway administration, as the case may be]—

- (a) any amount due under a liability incurred by the subscriber or depositor to ³[Government or the railway administration], but not exceeding in any case the total amount of any contributions credited to the account of the subscriber or depositor and of any interest or increment which has accrued on such contributions; or

- (6) where the subscriber or depositor has been dismissed from ^{his} employment for any reasons specified in this behalf in the rules of the fund, or where he has resigned such employment within five years of the commencement thereof, the whole or any part of the amount of any such contributions, interest and increment.

Protection
for acts
done in
good faith.

7. No suit or other legal proceeding shall lie against any person in respect of anything which is in good faith done or intended to be done under this Act.

Power to
apply the
Act to
other
provident
funds.

8. The Local Government may, by notification in the local official Gazette, direct that the provisions of this Act shall apply to any provident fund established for the benefit of its employees by any local authority within the meaning of the Local Authorities Loans Act, 1914, and, on the making of such declaration, this Act shall apply accordingly, as if such provident fund were a Government provident fund and such local authority were the Government.

No. 6493 Ex. — The 10th December 1927.—In exercise of the powers conferred by clause (j) of sub-section (2) of section 85 of the Bengal Excise Act, 1909 (Bengal Act V of 1909), the Government of Bengal (Ministry of Excise) are pleased to make the following rules regulating the procedure to be followed before licenses for the

retail vend of excisable articles are granted in the districts of the 24-Parganas, Dacca, Chittagong and Rangpur under section 34 of the said Act :—

(I) In these rules "the Board" means the licensing board appointed under clause (b) of sub-section (2) of section 7 of the Act to discharge the functions of a Collector in any of the said districts.

(II) (a) Applications for licenses for sale of foreign liquor, country spirit, *tari*, *pachwai*, *ganja*, *bharg* and *charas* in any place where no such license already exists shall be addressed to the "Collector of the district". No such application received before the 1st April or after the 1st September in each year shall be considered.

(b) The Superintendent of Excise shall have proper enquiries made regarding the necessity or otherwise for any new licenses duly applied for under sub-rule (a) from the point of view of genuine local demand, if any, and the absence or otherwise of any local facilities for obtaining the article for which the license is required. He shall submit copies of the applications, together with his observations thereon, to the Board by the 1st October each year.

(c) The Board shall consider all such applications in a meeting to be convened on or before the 20th October each year, and decide what new licenses they propose to grant after considering the applications and the observations of the Superintendent of Excise.

(d) Such licenses as the Board proposes to grant in any new place shall be incorporated in the list prepared by the Board under section 30 of the Act in accordance with rule (IV).

(III) By the 1st October each year, the Superintendent of Excise of each district shall prepare and submit to the Board a list of existing shops for the sale of the articles referred to in rule (II), arranging the shops separately according to municipalities, subdivisions and thanas. This list shall show the following figures for the preceding year :—

- (1) in the case of foreign liquor shops, the monthly sales of "spirits" and "beers" in bulk gallons;
- (2) in the case of country spirit shops, the monthly issues in L. P. and bulk gallons;
- (3) in the case of *pachwai* shops, the monthly sales in maunds of rice;
- (4) in the case of drug shops, the monthly issues in seers;
- (5) in the case of *tari* shops, the monthly license fee (including tree tax);
- (6) in every case, the total average monthly revenue derived from each shop; and
- (7) in every case, the distance of the shop from the nearest shop of the same nature.

(IV) On or before the 5th November—

- (a) the Board shall comply with the provisions of section 30 and section 31 of the Act in respect of existing licenses which they propose to renew and new licenses which they propose to grant.
- (b) the Board shall also send to the Chairman of each Local Board an extract reproducing so much of the said list as relates to shops situated within the jurisdiction of the Local Board.
- (c) If any shop or shops be situated within the limits of a cantonment or within a distance of two miles from a cantonment, the Board shall send a list of such shops to the Commanding Officer of the cantonment.
- (d) If any shop be situated within one quarter of a mile from any educational institution, temple, mosque or church, railway workshop, mill, factory or tea garden, the Board shall send a list of such shops to the authority in control of such educational institution, temple, mosque or church, railway workshop, mill, factory or tea garden.

(V) Every list sent out under section 31 of the Act or under rule (iv) shall be accompanied by a notice inviting the opinion and objections, if any, of the person to whom it is addressed, regarding the shops specified in the list. All opinions and objections shall be sent so as to reach the Board by the 20th November each year.

(VI) An abstract of all opinions and objections received in pursuance of the notices referred to above shall be prepared by the Secretary of the Board and circulated to all the members of the Board by the 1st December each year for consideration and for such enquiry as any of the members may deem necessary to make, before final decisions are reached.

(VII) By the 10th February each year the Board shall comply with the provisions of sub-section (2) of section 34 of the Act.

Minister-in-charge : The Hon'ble Nawab Musharraf Hossain, Khan Bahadur.

No. 6494Ex.—The 10th December 1927.—In exercise of the powers conferred by section 5 of the Opium Act, 1878 (1 of 1878), and in supersession of so much of Notification No. 1612S.R., dated the 11th June 1918, as relates to sections 30 to 35 of the Bengal Excise Act, 1909 (Bengal Act V of 1909), the Government of Bengal (Ministry of

RESOLUTION.

New Delhi, the 9th November 1927.

No. 2894-E.—With the approval of His Majesty's Secretary of State for India, the Government of India have, in consultation with the Public Service Commission, framed the regulations for recruitment in India to

- (a) the Electrical Engineering Department;
- (b) the Signal Engineering Department;

of the Superior Revenue Establishments of State Railways.

The regulations for recruitment to the Mechanical Engineering and Transportation (Power) Departments of the Superior Revenue Establishments of State Railways, published as an Annexure to Resolution No. 2058-E., dated the 15th July 1926, have also been revised and combined with the above regulations and are superseded by them.

The annexure to this Resolution contains the rules which will in future govern recruitment to and training for the above services.

ORDERED that this Resolution be communicated to the Departments of the Government of India, the Provincial Governments, Minor Local Governments, and the Agents of State and Company Railways noted below :—

Government of India, Home Department.

Government of India, F. and P. Department.

The Governments of Assam, Bengal, Bihar and Orissa, Bombay, Burma, Central Provinces, Madras, United Provinces, Punjab, the North-West Frontier Province, Delhi Province and Coorg.

The Public Service Commission.

The Agents, N. W., E. I., E. B., G. I. P., A. B., B., B. and C. I., B. N., Burma, M. and S. M., B. and N. W., R. and K. and S. L. Railways.

ORDERED also that the Resolution be published in the *Gazette of India*.

J. C. HIGHET,

Secretary, Railway Board.

Regulations for the recruitment in India for the Mechanical Engineering, Transportation (Power), Electrical Engineering and Signal Engineering Departments of the Superior Revenue Establishment of State Railways.

PART I.—GENERAL.

1. The permanent establishment of the Mechanical Engineering Transportation (Power), Electrical Engineering and Signal Engineering Departments of the Superior Revenue Establishment of State Railways is recruited from the following sources :—

- (1) Persons of non-Asiatic domicile appointed by the Secretary of State by selection from the United Kingdom.
- (2) Persons of Indian domicile appointed in India by the Government of India under these regulations.

(a) Mechanical Engineering and Transportation (Power) Departments—by selection.

(b) Electrical Engineering Department—in equal proportion by the two following methods :—

(i) By selection.

(ii) On the results of a competitive examination held in India.

(c) Signal Engineering Department—on the results of a competitive examination held in India.

- (3) Promotion of specially qualified subordinates of the department concerned.
 (4) Occasional admission of other qualified persons.

NOTE.—These regulations provide for periods of training to persons appointed in India, *vide* Appendices I to IV. Until apprentices recruited under these regulations become fully qualified requirements of the departments will be met by recruitment under clauses (3) and (4) and by recruitment of persons of non-Asiatic or Indian domicile by the Secretary of State by selection in the United Kingdom.

2. The final selection of candidates for appointment by selection will be made on the recommendation of the Public Service Commission, and only candidates selected by Local Selection Committees will be permitted to appear at the competitive examination. Regulations prescribing the qualifications of candidates, methods of preliminary selection and the rules for the examination are detailed in Part II of these Regulations.

3. From the lists prepared by the Public Service Commission (*vide* Regulations 27 and 37) of candidates who have in the opinion of the Commission attained the qualifying standard, candidates, to the extent of twice the number of vacancies to be filled, will be appointed as special class apprentices (*see* Regulation 4 below) provided that the Government of India are satisfied that they are duly qualified in other respects.

Should any selected candidate become disqualified the Government of India will determine whether the vacancy thus created shall be filled or not.

NOTE 1.—Appointments will be made separately from the two lists, *viz.*,

- (i) list of candidates for the Mechanical Engineering and Transportation (Power) Departments and candidates for appointment by selection to the Electrical Engineering Department;
 (ii) list of candidates for the Electrical Engineering and Signal Engineering Departments by competitive examination.

NOTE 2.—Apprentices appointed from the list referred to in clause (i) of Note 1 will be allotted to the Mechanical Engineering, Transportation (Power), or Electrical Engineering Department at the discretion of Government, but so far as it is practicable an apprentice will be allotted to the department for which he expressed his preference on his application.

NOTE 3.—Apprentices appointed from the list referred to in clause (ii) of Note I will be allotted to the Electrical Engineering or Signal Engineering Department at the discretion of Government, but so far as it is practicable an apprentice will be allotted to the department for which he expressed his preference on his application.

4. (a) Of the total number of apprentices to be appointed by selection to the Mechanical Engineering, Transportation (Power), and Electrical Engineering Departments, two-thirds will be selected in the strict order of merit awarded by the Public Service Commission, provided that number of candidates is declared by the Commission as properly qualified for selection. The remaining one-third will be reserved by the Government of India to redress, so far as may be necessary, marked communal inequalities, and any appointments, which it may be necessary to make on these grounds, shall be made by the Governor General in Council, after consultation with the Public Service Commission, by direct nomination from among candidates who have been declared by the Commission to have attained the qualifying standard. Such vacancies among one-third reserved as may not be required for the redress of communal inequalities, or for which duly qualified candidates may not be forthcoming, shall be filled in the direct order of merit awarded to the candidates by the Public Service Commission.

(b) Apprentices to be appointed to the Signal Engineering Department and the Electrical Engineering Department on the results of the competitive examination will be selected in the direct order of merit awarded by the Public Service Commission provided that number is declared by the Commission as properly qualified for selection.

5. Candidates selected as special class apprentices shall be required to undergo practical and theoretical training. For the periods and courses of training, and terms and conditions of apprenticeship see Appendices I to IV.

NOTE.—The Government of India may at their discretion alter or modify the periods and courses of training.

6. On the successful termination of the apprenticeship, apprentices, not less than the number of vacancies against which they were originally selected, will be appointed as probationers on an agreement for three years in the first instance, and will during the period of probation draw pay as shown below:—

		Rs.
Mechanical Engineering Department	.. { First year	.. 375
Transportation (Power) Department	.. { Second 425
Electrical Engineering Department	.. { Third	.. 475
	.. { First	.. 300
Signal Engineering Department	.. { Second	.. 350
	.. { Third	.. 400

NOTE 1.—The retention in service of the probationers and the grant of annual increment are subject to satisfactory reports on their work being received at the end of each year of probation.

NOTE 2.—Service as a probationer may be terminated in the case of the Mechanical Engineering, Transportation (Power) and Electrical Engineering Departments on 3 months' notice on either side, and in the case of the Signal Engineering Department on one month's notice on either side.

7. (a) In the case of the Signal Engineering Department, probationers shall, during the second year of probation, be required to undergo a course of training, at the Railway School/College of Transportation, in Transportation for a period of six weeks.

(b) On the satisfactory completion of probation for the first two years Signal Engineering probationers will be sent to the United Kingdom for a year to acquire practical experience of Signalling work on British Railways.

NOTE 1.—A free first class passage to the United Kingdom will be granted to the probationers, and full Indian pay will be allowed during the voyage and for the period of stay in the United Kingdom.

NOTE 2.—While in the United Kingdom, probationers will be under the supervision and control of the High Commissioner for India.

NOTE 3.—Any fee or premium, which may be required, in the opinion of the High Commissioner for India, to secure adequate training, will be paid by Government.

8. (a) At the conclusion of the probationary period, all probationers, in the Mechanical Engineering, Transportation (Power) and Electrical Engineering Departments, who are favourably reported on, shall be required to undergo a final practical departmental test, and will, if successful, be confirmed in the Mechanical Engineering, Transportation (Power) or Electrical Engineering Department, as the case may be, of the Superior Revenue Establishment of State Railways, on a pay of Rs. 525. On confirmation their agreement will be continued, subject to their service being terminable on six months' notice on either side.

(b) On the satisfactory conclusion of the training in the United Kingdom, Signal Engineering probationers will be confirmed in the Signal Engineering Department on a pay of Rs. 475. The confirmation will have effect from the date on which the three years' probation is completed or the date on which the practical training is completed whichever is later. On confirmation their agreements will be continued, subject to their service being terminated on six months' notice on either side.

NOTE 1.—Successful Signal Engineering probationers will be granted a free first class passage back to India and full Indian pay for the period of the voyage.

NOTE 2.—Signal Engineering probationers, who do not satisfactorily complete the practical training in the United Kingdom, will be discharged from service. One month's notice of discharge will be issued along with the intimation that the probationer has been unsuccessful. They may be granted a free second class passage back to India, provided they embark for India within 3 months from the date of intimation that they have been unsuccessful.

9. Probationers in all departments will be required to pass a language examination in *Urdu* by the preliminary standard, modified to suit the requirements of the Railways, before they can be confirmed or granted any increment, beyond the first, during the period of probation. Probationers, whose vernacular is *Urdu*, may be exempted from passing the language examination. Failure to pass the examination within the probationary period involves liability to removal from service.

10. Officers of the Mechanical Engineering, Transportation (Power), Electrical Engineering and Signal Engineering Departments, including probationers appointed under Regulation 6, will not be entitled to pension on quitting the service, but will be eligible throughout their service for the benefits of the State Railway Provident Fund, to which they will be required to subscribe, and by the rules of which they will be required to abide. They will also be eligible for gratuities for good, efficient, faithful and continuous service. A summary of the benefits of the State Railway Provident Fund and the Gratuity Rules will be found in Appendix V.

11. Pay as probationer will, in the case of the Mechanical Engineering, Transportation (Power) and Electrical Engineering Departments, commence from the date of landing in India on return from the United Kingdom after completion of training. Pay as probationer in the Signal Engineering Department will commence from the date of joining service in India on completion of apprenticeship. Service for increment will also count from the same dates.

Particulars as to pay are contained in Appendix VI.

12. Leave Rules applicable to officers of State Railways are under revision. Officers recruited under these regulations will, pending the revision of the rules, be entitled to leave under the existing rules, but the revised rules will apply to them when they are brought into force.

13. Officers will ordinarily be employed throughout their service on the Railway to which they may be posted on first appointment as probationer, and will have no claim, as a matter of right, to transfer to some other Railway. But the Government of India reserve the right to transfer such officers, in the exigencies of service, to any other Railway or project in or out of India.

14. The Government of India reserve the right of assigning, to the officers promoted from the subordinate ranks and to those appointed under Regulation 1 (4), positions in the seniority list at their discretion.

**Part II.—Qualifications of Candidates, Methods of Selection and
Rules of Examination.**

A.—GENERAL.

15. Every candidate must be a male who is either (i) a British subject of Indian domicile, who was, and whose father and mother were, born within His Majesty's dominions and allegiance, or (ii) a British subject of Indian domicile whose father was at the time of the candidate's birth and still is (or if dead, continued until his death to be) a British subject or a subject of a State in India, or (iii) a ruler or a subject of a State in respect of whom the Governor General in Council has made a declaration under Section 96A of the Government of India Act.

16. (1) Every candidate shall make application before such date and in such form as the Governor General in Council may direct. The application shall be made to the authority of the area in which his parents reside at the time of his application or have previously resided for a period of not less than 3 years or in which he has himself resided (otherwise than as a student at a school or University only), for a like period.

(2) The application shall be made, if based on residence in a Governor's province, to the Chief Secretary of that province, if based on residence in Coorg, the N.-W. F. P., Delhi, Ajmer-Merwara or British Baluchistan to the Chief Commissioner concerned, and if based on residence in a State in India to the Political Officer or Agent through the Darbar.

(3) No candidate shall make more than one application in any year.

17. *No recommendations except those invited in the Form of Application will be taken into consideration. Any attempt on the part of a candidate to obtain support for his application by other means may disqualify him for appointment.*

18. A candidate must be in good mental and bodily health and free from any physical defect likely to interfere with the efficient performance of his duties as a member of the Railway Services.

19. A candidate must satisfy the Public Service Commission that his character is such as to qualify him for employment in the Railway Services.

**B.—APPOINTMENT BY SELECTION TO THE MECHANICAL ENGINEERING, TRANSPORTATION
(POWER) AND ELECTRICAL ENGINEERING DEPARTMENTS.**

20. Candidates for appointment by selection as special class apprentices in the Mechanical Engineering, Transportation (Power) and the Electrical Engineering Departments must be under 19 years of age on the first day of January of the year in which the selection is made.

21. Candidates must have passed the intermediate Examination in Arts, Science or Engineering of any Indian University approved by the Governor General in Council or the Cambridge Higher School Certificate Examination or the Higher Diploma Examination of the Mayo College, Ajmer.

22. There will be a preliminary selection of candidates by a local Selection Committee in order to determine what candidates should be considered by the Public Service Commission. The total number of candidates selected by all the Selection Committees shall not exceed 10 for each vacancy to be filled.

NOTE 1.—The vacancies in the Mechanical Engineering and Transportation (Power) Departments, and those in the Electrical Engineering Department to be filled by this method will be added together for the purpose of this rule.

NOTE 2.—The vacancies referred to in this rule are the actual vacancies in the departments and not the number of special class apprentices to be appointed which will be double the number of the vacancies (*vide* Regulation 3).

23. The percentage of candidates to be drawn from each of the areas specified in the following table shall not exceed the number shown against it. This percentage is hereinafter referred to as the "provincial quota":—

Assam	3
Bengal (including Sikkim)	15
Bihar and Orissa	10
Bombay (including Hyderabad, Baroda and the States in the Western India States Agency)	13
Burma	6
Central Provinces (including Gwalior and the Central India States)	7
Madras (including Coorg, Mysore, Travancore, Cochin and the States of the Madras Agency)	17

The Punjab (including the Delhi Province, Kashmir and the States of the Punjab Agency)	11
The United Provinces (including Ajmer-Merwara and the Rajputana States)	16
The North West Frontier Province and Baluchistan	2

The provincial quota worked out according to the above proportion will be rounded off to the nearest number, fractions of half and over being taken as 1 and smaller fractions ignored, provided that the provincial quota shall in no case be less than one.

24. The Local Government of the Governor's province which coincides with, or which is included in each of the areas mentioned in the foregoing regulation, or the Chief Commissioner of the N.-W. F. Province, as the case may be, shall appoint a Selection Committee, which shall include at least one non-official member and one member nominated by the Railway Board. The Public Service Commission may, if they think it desirable, nominate one of their members to sit on any selection committee. In constituting selection committees arrangements shall be made for the due representation of Administrations or States in India included in each area from which there may be candidates.

25. The local selection committees in making their selection shall exclude any candidate whom they regard as unsuitable by reason of personality, character, physique or otherwise for the Railway Services.

26. The candidates chosen by the selection committee will be required to undergo examination by a medical board and to satisfy that board that they comply with the requirements of Regulation 18.

A list of candidates selected by the selection committee and who have satisfied the medical board, together with their application forms shall be sent by the authority appointing the selection committee to the Public Service Commission, with such observations as they may desire to make.

NOTE.—The medical board will be constituted by the authority appointing the selection committee, and will include one Railway Medical Officer nominated by the Railway Board.

27. The Public Service Commission shall interview the candidates whose names have been forwarded to them under Regulation 26, and shall place the candidates, whom they consider as qualified for appointment, on a list in order of merit.

C.—APPOINTMENT ON THE RESULTS OF EXAMINATION TO THE ELECTRICAL ENGINEERING AND SIGNAL ENGINEERING DEPARTMENTS.

28. Candidates for appointment to the Electrical Engineering and Signal Engineering Departments by the competitive examination must be under 24 years of age on the first day of August in the year in which they are selected for admission to the examination. The age limit applies whether or not the candidate is already in Government service.

29. A candidate for the Electrical Engineering or the Signal Engineering Department must have passed the Associate Membership Examination of the Institution of Engineers (India) or one of the final examinations mentioned in Appendix VII and recognised by the Institution of Engineers (India) as exempting from the examination for Associate Membership, subject to the condition that the final examination included Electrical or Mechanical Engineering subjects.

30. There will be a preliminary selection of candidates by a local selection committee and the rules contained in Regulations 22-26 shall apply *mutatis mutandis* to candidates for appointment to the Electrical and Signal Engineering Departments by examination.

NOTE.—For purposes of Regulation 22 the vacancies in the Signal Engineering Department and those in the Electrical Engineering Department to be filled by competitive examination will be added together. (See also Note 2 to Regulation 22).

31. The examination of the candidates whose names have been forwarded to the Public Service Commission (*vide* Regulation 26) will include the following subjects each of which will carry the number of marks shown against it:—

(a) Compulsory—

	Marks.
(1) English (including Essay and Precis Writing)	100
(2) General knowledge	100
(3) Applied Mathematics	100
(4) Electrical Engineering	100
(5) <i>Viva Voce</i>	100

(b) *Optional*—

Not more than two of the following subjects :—			Marks.
(1) Physics (including Electricity and Magnetism)	100
(2) Chemistry and Metallurgy	100
(3) Prime Movers	100
(4) Hydraulics and Hydraulic Machines	100

32. The examination shall be held in India at such time and place as the Governor General in Council may direct.

33. The standard and syllabus of the examinations shall be such as the Public Service Commission prescribe, and the Commission shall, if they think it desirable, determine what shall be the qualifying marks in all or any of the subjects of examination.

34. From the marks assigned to candidates in each subject such deduction shall be made as the Public Service Commission may consider necessary in order to secure that no credit is allowed for merely superficial knowledge.

35. If a candidate's handwriting is not easily legible a deduction will be made on this account from the total marks otherwise accruing to him.

36. Credit will be given for good English including orderly, effective and exact expression combined with due economy of words in all subjects of the examination and not only in subjects which are specially devoted to English.

37. A list of competitors who are considered by the Public Service Commission as having attained the qualifying standard shall be made out in order of merit as disclosed by the aggregate marks finally awarded to each competitor at the examination.

D.—MISCELLANEOUS.

38. Candidates must pay the following fees:—

- (i) Rs. 5 with the application form.
- (ii) Rs. 16 before examination by a Medical Board.
- (iii) In the case of candidates selected for admission to a competitive examination Rs. 50 within three weeks after the notification of selection.

No claim for a refund of these fees will be entertained.

39. Candidates for appointment by selection who are to be interviewed by the Public Service Commission (Regulation 26) shall be furnished by the Commission with a certificate entitling them to the interview; similarly candidates selected for admission to the examination shall be furnished by the Public Service Commission with a certificate for admission to the examination.

Unless a candidate is in possession of such a certificate he shall not be interviewed by the Public Service Commission or admitted to the examination.

APPENDIX I.

PERIOD AND COURSE OF TRAINING AND TERMS AND CONDITIONS OF SPECIAL CLASS APPRENTICESHIP IN THE MECHANICAL ENGINEERING AND TRANSPORTATION (POWER) DEPARTMENTS.

1. Candidates finally selected for appointment under Regulation 3 will be appointed as special class apprentices for seven years in the first instance under an indenture, binding them to serve on the State Railways on the completion of their training if their services are required.

The continuance of the apprenticeship from year to year will depend on satisfactory reports being received from the authorities under whom the apprentice may be working. If at any time during his apprenticeship, an apprentice does not satisfy the superior authorities that he is making good progress he will be liable to be discharged from his apprenticeship.

2. The apprentices will be required to undergo practical and theoretical training in a Railway Workshop for the first three years of their apprenticeship. During this period they will be granted a stipend of Rs. 75 per mensem. At the end of each of the three years the candidates will be examined, and, if unsuccessful, will be discharged from their apprenticeship.

3. If successful at the examination at the close of the third year of the apprenticeship, well-reported on during the period of 3 years' training in the workshops and otherwise found suitable—

(a) apprentices for the Mechanical Engineering department will be sent to an Engineering College to be prescribed by the Governor General in Council for a course of two years' training in the higher mechanical course; they will be required to continue practical work in the workshops during the college vacations;

(b) apprentices for the Transportation (Power) department will be transferred to the Running department of State Railways for two years, during which period they will be required, from time to time, to attend courses at the Railway School/College of Transportation.

During this period of apprenticeship, the apprentices will be granted a stipend of Rs. 100 per mensem.

4. At the expiration of the second period of training referred to in Rule 3 above, the apprentices will be examined, and will be listed in order of merit on the results of this examination and the examinations during the first 3 years of apprenticeship, taking also into account the reports on the apprentices received during the course of the apprenticeship referred to in Rule 1 above. Apprentices to the number of vacancies, for which the selection was made in the first instance, will be selected in direct order of merit for a further period of training for two years (see Rule 5 below), provided that they have attained the qualifying standard, and the others will be discharged from their apprenticeship.

Provided that if at least half the number of the apprentices, selected under Regulation 4 (a) to redress communal inequalities, do not become eligible for selection under this rule, the deficiency will be made good by direct selection, the number to be selected according to merit being reduced by the same number; in no case, however, will final selection be made if the apprentice has not attained the qualifying standard.

NOTE.—In working this proviso, the number of apprentices in the Electrical Engineering Department, appointed by selection in the first instance, finally selected for further training in the United Kingdom will also be taken into account.

5. Apprentices selected under Rule 4 above will be sent to the United Kingdom to undergo a further period of training for two years, as prescribed in Rule 6 below. During this period of training in the United Kingdom they will be granted a stipend of £250 per annum. They will be granted a free 2nd class passage to the United Kingdom, and during the period of voyage to the United Kingdom, their stipend of Rs. 100 per mensem will be continued.

NOTE 1.—While in the United Kingdom, apprentices will be under the supervision and control of the High Commissioner for India.

NOTE 2.—Any fee or premium, which may be required, in the opinion of the High Commissioner for India, to secure adequate training, will be paid by Government.

6. The course of training in the United Kingdom is detailed below:—

Length of Course—two years.

Special Class Apprentices will be required to specialise in either workshop practice or locomotive running work.

Workshops (a).—In the former case the whole period will be spent in a selected Locomotive or Carriage and Wagon Workshop under conditions existing for apprentices and improvers, three months of the time being spent in the Drawing Office and three months in the Correspondence or Accounts Section.

Running (b).—In the latter case, six months will be spent as a fitter in a Running Shed of a British Railway, six months as a fireman on running engines under conditions applying to ordinary staff, six months attached to a Running Shed Office, and six months in the Running Department of an electrified section of a railway.

Theoretical.—In all cases the apprentice will be required to attend, after working hours, a Technical College or special lectures on Engineering subjects, and before returning to India must qualify for Associate Membership of the Institution of Civil or Mechanical Engineers.

7. (a) Apprentices who have successfully completed their training in the United Kingdom, and who will be appointed as Probationers in the Mechanical Engineering and Transportation (Power) Departments (*vide* Regulation 6), will be granted a free first class passage to India. The stipend of £250 p. a. will be continued during the period of voyage.

(b) Unsuccessful apprentices will be discharged from their apprenticeship, one month's notice of discharge being given along with the intimation that the apprentice has been unsuccessful. They may be granted a free second class passage back to India provided that they embark for India, within a period of three months from the date of intimation that they have been unsuccessful.

8. Except as provided for in Rule 7 (b) in all cases of discharge from apprenticeship, a week's notice will be given.

APPENDIX II.

PERIOD AND COURSE OF TRAINING AND TERMS AND CONDITIONS OF APPRENTICESHIP FOR SPECIAL CLASS APPRENTICES APPOINTED BY SELECTION TO THE ELECTRICAL ENGINEERING DEPARTMENT.

1. Candidates finally selected for appointment under Regulation 3 will be appointed as special class apprentices for seven years in the first instance under an indenture, binding them to serve the State Railways on the completion of their training if their services are required.

The continuance of the apprenticeship from year to year will depend on satisfactory reports being received from the authorities under whom the apprentice may be working. If at any time during his apprenticeship an apprentice does not satisfy the superior authorities that he is making good progress he will be liable to be discharged from his apprenticeship.

2. The apprentices will be required to go through 2½ years' apprenticeship at Railway Workshops, consisting of 1½ years' general workshop practice and 1 year in the Electrical Department, the practical training being accompanied during the whole period by theoretical training at a technical school. During the period of apprenticeship apprentices will be granted a stipend of Rs. 75 per mensem.

At the end of the first 18 months' training and at the close of the 2½ years' apprenticeship, the apprentices will be examined, and, if unsuccessful, will be discharged from their apprenticeship.

3. Apprentices, successful at the examinations referred to in Rule 2 above, will be sent to an Engineering College to be prescribed by the Governor General in Council for a course of training in higher Electrical Engineering for a period of 2 years; they will be required to continue practical work in the workshops during the college vacations.

During this period of apprenticeship apprentices will be granted a stipend of Rs. 100 per mensem.

4. At the termination of the course of training referred to in Rule 3 above the apprentices will be examined, and successful candidates will be listed in order of merit on the results of this as well as the previous examination (*vide* Rule 2 above) taking also into account the reports on the apprentices, received during the course of the apprenticeship, referred to in Rule 1 above. Apprentices to the number of vacancies, for which the selection was made in the first instance, will be selected in direct order of merit for further training (see Rule 5 below) provided that they have attained the qualifying standard, and the others will be discharged from their apprenticeship.

5. (a) Apprentices selected under Rule 4 above will be sent to the United Kingdom to undergo a further training for 2½ years. During this period of training they will be granted a stipend of £250 per annum. They will be granted a free second class passage to the United Kingdom, and during the period of voyage their stipend of Rs. 100 will be continued.

(b) Of the 2½ years' training in the United Kingdom, 2 years will be spent with a firm of repute specialising in the manufacture of electrical equipment and in a large power station, and six months in the running department of an electrified section of a railway.

The training will comprise:—

- (i) Test-bed experience.
- (ii) Correspondence and estimating.
- (iii) Boiler-house control.
- (iv) Engine-room control.
- (v) Electric Traction.

The training will be directed towards competence to supervise electrical work of the varied nature which may occur on Indian Railways, the most important of which are economical production, distribution and use of electricity for all purposes and the problems connected with electric traction.

NOTE 1.—While in the United Kingdom, apprentices will be under the supervision and control of the High Commissioner for India.

NOTE 2.—Any fee or premium, which may be required, in the opinion of the High Commissioner for India, to secure adequate training, will be paid by Government.

6. (a) Apprentices, who have successfully completed their training in the United Kingdom, and who will be appointed as Probationers in the Electrical Engineering Department (*vide* Regulation 6), will be granted a free first class passage to India. The stipend of £250 per annum will be continued during the period of voyage.

(b) Unsuccessful apprentices will be discharged from their apprenticeship, one month's notice of discharge being given along with the intimation that the apprentice has been unsuccessful. They may be granted a free second class passage back to India, provided that they embark for India within a period of three months from the date of intimation that they have been unsuccessful.

7. Except as provided for in Rule 6 (b) in all cases of discharge from apprenticeship, a week's notice will be given.

APPENDIX III.

PERIOD AND COURSE OF TRAINING AND TERMS AND CONDITIONS OF APPRENTICESHIP FOR SPECIAL CLASS APPRENTICES APPOINTED TO THE ELECTRICAL ENGINEERING DEPARTMENT ON THE RESULTS OF THE COMPETITIVE EXAMINATION.

1. Candidates finally selected for appointment under Regulation 3 will be appointed as special class apprentices for five years in the first instance under an indenture, binding them to serve the State Railways on the completion of their training if their services are required.

The continuance of the apprenticeship from year to year will depend on satisfactory reports being received from the authorities under whom the apprentice may be working. If at any time during his apprenticeship an apprentice does not satisfy the superior authorities that he is making good progress he will be liable to be discharged from his apprenticeship.

2. The apprentices will be required to go through 2½ years' apprenticeship at Railway Workshops, consisting of 1½ years' general workshop practice and 1 year in electrical power houses and workshops under the supervision of the Electrical Engineer. During this period of apprenticeship apprentices will be granted a stipend of Rs. 100 p. m.

At the end of the first 18 months' training and at the close of 2½ years' apprenticeship the apprentices will be examined, and, if unsuccessful, will be discharged from their apprenticeship.

3. Successful apprentices will be listed in order of merit on the results of these examinations taking also into account reports on the apprentices, received during the course of the apprenticeship referred to in Rule 1 above. Apprentices to the number of vacancies, for which the selection was made in the first instance, will be selected in direct order of merit for further training (see Rule 4 below) provided that they have attained the qualifying standard, and the other will be discharged from their apprenticeship.

4. (a) Apprentices selected under Rule 3 above will be sent to the United Kingdom to undergo a further training for 2½ years. During this period of training they will be granted a stipend of £250 per annum. They will be granted a free second class passage to the United Kingdom, and during the period of voyage their stipend of Rs. 100 will be continued.

(b) Of the 2½ years' training in the United Kingdom, 2 years will be spent with a firm of repute specialising in the manufacture of electrical equipment and in a large power station, and six months in the running department of an electrified section of a railway.

The training will comprise:—

- (i) Test-bed experience.
- (ii) Correspondence and estimating.
- (iii) Boiler-house control.
- (iv) Engine-room control.
- (v) Electric Traction.

The training will be directed towards competence to supervise electrical work of the varied nature which may occur on Indian Railways, the most important of which are economical production, distribution and use of electricity for all purposes and the problems connected with electric traction.

NOTE 1.—While in the United Kingdom, apprentices will be under the supervision and control of the High Commissioner for India.

NOTE 2.—Any fee or premium, which may be required, in the opinion of the High Commissioner for India, to secure adequate training, will be paid by Government.

5. (a) Apprentices, who have successfully completed their training in the United Kingdom, and who will be appointed as Probationers in the Electrical Engineering Department (*vide* Regulation 6), will be granted a free first class passage to India. The stipend of £250 per annum will be continued during the period of voyage.

(b) Unsuccessful apprentices will be discharged from their apprenticeship, one month's notice of discharge being given along with the intimation that the apprentice has been unsuccessful. They may be granted a free second class passage back to India, provided that they embark for India within a period of three months from the date of intimation that they have been unsuccessful.

6. Except as provided for in Rule 5 (b) in all cases of discharge from apprenticeship a week's notice will be given.

APPENDIX IV.

PERIOD AND COURSE OF TRAINING AND TERMS AND CONDITIONS OF APPRENTICESHIP FOR SPECIAL CLASS APPRENTICES APPOINTED TO THE SIGNAL ENGINEERING DEPARTMENT ON THE RESULTS OF THE COMPETITIVE EXAMINATION.

1. Candidates finally selected for appointment under Regulation 3 will be appointed as special class apprentices for three years in the first instance under an indenture, binding them to serve the State Railways on the completion of their training if their services are required.

The continuance of the apprenticeship from year to year will depend on satisfactory reports being received from the authorities under whom the apprentice may be working. If, at any time during his apprenticeship, an apprentice does not satisfy the superior authorities that he is making good progress he will be liable to be discharged from his apprenticeship.

During the period of apprenticeship, apprentices will be granted a stipend of Rs. 100 p. m.

2. Apprentices will be required to undergo practical training for a period of 3 years, as detailed below:—

1st year.—Training in Railway workshops as follows:—

8 months in the Mechanical workshops; 4 months in the Electrical workshops.

During this period apprentices will be employed in manufacturing Mechanical and Electrical Signalling appliances, and part of the time will be spent in the foundry, smithy and machine shop.

2nd year.—6 months in the Railway signal shops (fitting and erecting shop); six months on out-door erection of new signalling installations under a senior Signal Inspector.

3rd year.—First 3 months on out-door erection as in the 2nd year; 9 months in the Signal Engineer's office, chiefly in the Drawing Branch.

3. At the end of each of the three years the apprentices will be examined, and, if unsuccessful, will be discharged from their apprenticeship.

4. On the results of these examinations taking also into account the reports on the apprentices received from time to time, the apprentices will be listed in order of merit. Apprentices to the number of vacancies for which selection was made in the first instance, will be selected in order of merit for appointment as Probationers in the Signal Engineering Department, provided that they have attained the qualifying standard. Apprentices not so selected will be discharged from their apprenticeship.

5. In all cases of discharge from apprenticeship a week's notice will be given.

APPENDIX V.

PROVIDENT FUND AND GRATUITIES.

The following is a summary of the rules relating to Provident Fund and Gratuities applicable to officers appointed to the Mechanical Engineering, Transportation (Power), Electrical Engineering and Signal Engineering Department of the Superior Revenue Establishment of State Railways.

Provident Fund.—The State Railway Provident Fund is established on the following basis:—

- (i) Every officer is required to subscribe to the Provident Fund at a uniform monthly rate of one-twelfth of emoluments, to which is added half-yearly a bonus at the rate of 100 per cent. of an officer's subscriptions for the half year.
- (ii) Compound interest at the rate of 4½ per cent. per annum is allowed on the officer's subscription and bonus. This rate is subject to reconsideration should the rates, at which the Government of India borrow, undergo modification, six months' notice being given to members before any alteration is made.
- (iii) The sum which thus accumulates to the credit of an officer is paid to him on quitting the service; or in the event of his death before retirement, to his legal representatives.

Gratuities.—Officers of Indian State Railways are also eligible on retirement, at the discretion of the Railway Board, for gratuities for good, efficient, faithful and continuous service, on the following conditions:—

- (a) Completion of 30 years' service, or
- (b) Attainment of the age of 50 years, or
- (c) Retirement on account of permanent incapacity due to bodily or mental infirmity, or
- (d) Abolition of appointment due to a reduction of establishment, if other suitable employment cannot be found for the officer.

The amount of gratuity admissible is as follows:—

- (a) For service not exceeding 18 years, half a month's pay for each year of service, subject to a maximum of six months' pay;
- (b) For service in excess of 18 years, six months' pay plus half a month's pay for each year after the eighteenth, subject to a maximum of 12 months' pay or Rs. 25,000, whichever is less.

In case of an officer's death while in service, the gratuity is paid to his widow or children dependent on him.

APPENDIX VI.

PARTICULARS AS TO PAY OF OFFICERS OF INDIAN DOMICILE OF THE MECHANICAL ENGINEERING, TRANSPORTATION (POWER), ELECTRICAL ENGINEERING AND SIGNAL ENGINEERING DEPARTMENTS OF THE SUPERIOR REVENUE ESTABLISHMENT OF STATE RAILWAYS.

1. The various ranks of the departments are at present as follows:—

Chief Transportation Superintendent, G. I. P. Railway	2,500—125—2,750

2. The increments will be given for approved service only and in accordance with the rules of the Department.

3. Pay will be drawn according to the junior scale, except when an officer is holding a charge which is declared to carry the senior scale of pay. No officer will, however, draw more than the pay of the ninth year of service (tenth year of service in the case of the Signal Engineering Department), unless the Agent is satisfied that he is fit to hold a charge carrying the senior scale of pay.

4. Pay on the senior scale will be drawn by officers holding charges which have been declared to carry the senior scale of pay. No officer on the senior scale of pay will draw more than the pay of the 16th year of service (17th year of service in the case of the Signal Engineering Department), unless the Railway Board are satisfied that he is fit for further promotion.

5. Promotions to administrative grades are dependent on the occurrence of vacancies in the sanctioned establishment and are made wholly by selection by the Railway Board; mere seniority is considered to confer no claim to promotion.

6. The administrative appointments shown under Transportation (Power) Department are also open to officers of the Transportation (Traffic) Department.

7. The administrative appointments shown under the Transportation (Power) Department are not reserved for officers of the Transportation (Power) or Transportation (Traffic) Department, and the Government of India reserve the right to appoint, at their discretion, an officer of any Department or Railway to any of these posts.

8. Officers of the Mechanical Engineering, Transportation (Power), Electrical Engineering and Signal Engineering Departments are eligible for appointment to administrative posts in the Agency and the Divisions.

APPENDIX VII.

LIST OF EXAMINATIONS WHICH ARE RECOGNISED BY THE INSTITUTION OF ENGINEERS (INDIA), AS EXEMPTING FROM THE EXAMINATION FOR ASSOCIATE MEMBERSHIP.

(1) Final examinations leading up to the following degrees of Indian Universities:—

- B. E. of Bombay University.
- B. E. of Calcutta University (College of Engineering, Sibpur).
- B. E. of Madras University.
- B. Sc. (Engineering), Benares Hindu University.

(2) Associateship examination of the Bengal Engineering College in Mechanical Engineering.

(3) Engineering certificate examination of the Thomason Civil Engineering College, Roorkee.

(4) Final examinations leading up to the following degrees of British Universities:—

- Oxford.*—B.A. with Honours in the Engineering Science Final Honours School.
- Cambridge.*—B.A. with Honours in Mechanical Science Tripos.
- St. Andrews.*—B.Sc. in Engineering.
- Glasgow.*—B.Sc. in Engineering.
- Edinburgh.*—B.Sc. in Engineering.
- Dublin.*—B.A.I. (Ordinary or with Honours in Engineering).
- Durham.*—B.Sc. in Civil, Mechanical or Electrical Engineering or in Naval Architecture (Honours or Ordinary degree).
- London.*—B.Sc. (Internal or External degree) in Engineering, Ordinary or with Honours [not including the B.Sc. in Engineering (Mining) or the B.Sc. in Engineering (Metallurgy)].

- Victoria University (Manchester).*—B.Sc. in Engineering (Honours degree, or Ordinary degree from 1925 onwards); B.Sc. Technical in Mechanical or Electrical Engineering (Honours Division in the Final Examination).
- Birmingham.*—B.Sc. in Civil, Mechanical or Electrical Engineering (Honours or Ordinary degree).
- Liverpool.*—B. Engineering in Civil, Mechanical, Electrical or Marine Engineering or Naval Architecture (Honours or Ordinary degree).
- Leeds.*—B.Sc. in Civil, Mechanical or Electrical Engineering (Honours or Ordinary degree).
- Sheffield.*—B. Engineering in Civil, Mechanical or Electrical Engineering (Honours degree or Ordinary degree with a first class in the Final Examination).
- Bristol.*—B.Sc. in Civil or Mechanical Engineering (Honours or Ordinary degree).
- University of Wales.*—B.Sc. (In Civil, Mechanical or Electrical Engineering).
- National University of Ireland.*—B.E.
- Queen's University, Belfast.*—B.Sc. in Engineering.
- (5) Sections A and B of the Associate Membership examination of the Institution of Civil Engineers.
- (6) Associate Membership examination of the Institution of Mechanical Engineers.
- (7) Associate Membership examination of the Institution of Electrical Engineers.
- (8) Examinations for Diploma in Engineering:—
- City and Guilds (Engineering) College, Kensington.
 - University College, London.
 - King's College, London.
- (9) Examination of the City and Guilds of London Institute, Technical College, Finsbury, for Diploma or Higher Certificate (three years' course) if taken by Matriculated students or students who have passed the Institution studentship examination or its recognised equivalent.
- (10) Examination for Certificate in Technology, Mechanical or Electrical Engineering—Manchester.
- (11) Final Diploma Examination in Mechanical or Electrical Engineering, of the Royal Technical College, Glasgow, provided an approved Matriculation examination has been passed before beginning the course.
- (12) Naval Officers Examination which qualifies as Lieutenant (E).
- (13) Examination for Professional Certificate for Constructors—Royal Naval College, Greenwich.
- (14) Examinations of Canadian, Australian, New Zealand and South African Universities:—
- B.Sc. Examination in "Civil" or "Mechanical" or "Electrical" Engineering (Honours or Ordinary degree)—McGill University (Montreal).
 - B.E. Examination in "Civil" or in "Mechanical and Electrical" Engineering—Sydney University.
 - B.C.E., B. Mech. E. or B.E.E. Examination—Melbourne University.
 - B.E. Examination in "Civil" or "Mechanical" or "Electrical" Engineering—New Zealand University.
 - B.E. Examination in "Civil" or "Mechanical" or "Electrical" Engineering—Adelaide University.
 - B.E. Examination in "Civil" or in "Mechanical and Electrical" Engineering—Queensland University.
 - B.E. Examination—University of Western Australia.
 - B. Sc. Examination in Engineering (until 1921)—South African University.
 - B.Sc. Examination in Engineering—Cape Town University.
 - B.Sc. Examination in "Civil" or in "Mechanical and Electrical" Engineering—Witwatersrand.

APPENDIX VIII.

SYLLABUS OF THE EXAMINATION FOR THE ELECTRICAL ENGINEERING AND SIGNAL ENGINEERING DEPARTMENTS IN THE COMPULSORY SUBJECTS (a) (3), (a) (4) AND IN THE OPTIONAL SUBJECTS.

(a) (3).—*Applied Mathematics.*

Statics.—Vectors, Notion of force, Gravitational or Engineer's unit of force. Various kinds of forces. Friction. Composition and resolution of concurrent forces. Moments. Parallel forces and centres of gravity. Couples. Conditions of equilibrium of non-current coplanar forces. Funicular polygon.

Statics.—Units of space and time. Rectilinear motion; motion of a projectile; angular motion; relative motion; simple harmonic motion.

Kinetics.—Newton's Laws. Absolute system of units. Linear momentum. Impact of elastic bodies. Impulse and impulsive forces. Angular momentum; moments of inertia and radii of gyration; impulsive torque. Centrifugal forces. Conical pendulum. Motion of the centre of mass. Cant on railway curves and banking of road tracks. Hoop stress and stress in the rim of a fly-wheel.

Work, power, kinetic and potential energy. Principle of energy—Kinetic energy due to rotation. Work done by a couple. Principle of Virtual work. Simple machines, mechanical advantage, and velocity ratio. Stable and unstable equilibrium. Deflection in a framed structure. Oscillations. Simple and Compound pendulum. Units and dimensions.

Hydrostatics.—Fluid pressure, its transmission, and measurement; density; specific gravity; metric system of units; resultant pressure; centre of pressure; equilibrium of floating bodies; metacentre. Laws of Boyle and Charles. Mixture of gases. Nature and action of simple hydraulic machines.

(a) (4).—*Electrical Engineering.*

Electric units. Commercial electrical measuring instruments for D. C. and A. C., their action and use in D. C., and A. C., circuits.

Dynamo electric Machines. Physical principles and essential parts of both Generators and Motors. Description of the standard form of field. Description of armature, lamination and its object, lap and wave windings, action of the armature winding and commutator. Arrangements of induced E. M. Fs. in wave and lap windings.

Description of Commutator and Brush Gear. Discussion of sparking at brushes and methods of dealing with it by contact resistance and E. M. Fs. Interpoles. Armature reaction.

Description of continuous current dynamos, series, shunt and compound wound. Method of regulating voltage, parallel running, characteristic curves.

Shunt and series motors and their working characteristics. Motor Starters. Losses in a motor and its Rating. Efficiency curves. Suitability of D. C. motor for different types of load.

Alternative current Principles, graphical representation of an A. C. frequency, phase and effective value of current and voltage. Use of rotating vectors. Resistance. Inductance and capacity. Power factor. Three-phase circuits and measurement of three-phase power supply. Production of rotatory field. Star and mesh connections.

Description of single and three-phase generators. Synchronising and parallel running.

Description of single and three-phase motors. Induction motors. Squirrel cage and wound motors. Methods of starting.

Transformers. Convertors and Motor-Generators. General description and discussion of their action and construction.

Accumulators. Boosters. Installation and upkeep.

Switchboard and arrangement of measuring, controlling and protective devices for D. C. and A. C. supply.

Mechanism of distribution of electric supply—Busbars. Feeders. Distributors and internal wiring. Requirements to be satisfied by conductors used in distribution as regards voltage regulation, reliability and economy. Value of high tension, three-wire system Balancers. Comparison of D. C. and A. C. Systems of Transmission and Distribution as regards amount of copper required for mains.

Overhead and underground mains. Principal types of cables used. Types of poles and insulators. Lightning arrestors.

Voltage drop in the D. C. and A. C. circuits and Transmission Lines.

Insulation resistance and its measurement, the megger.

Calculation of size of conductors.

Three-phase Transmission and Distribution. Various systems in use.

Transmission lines and arrangements at Power and Sub-Stations.

Internal wiring for power and light. Various systems in use. Testing for insulation and resistance and localisation of faults. Wiring rules.

General principles of electric lighting. Lighting of rooms and streets. Description of lamps and fittings in general use.

Electric heating apparatus.

Capital and maintenance costs. Cost of wiring per point. Systems of charging for electric energy.

(b) (1).—*Physics (including Electricity and Magnetism).*

Heat.—The methods of calorimetry and thermometry. Vapour-pressures, critical temperature and pressure. Conduction and diffusion of heat and the determination of constants. Radiation and absorption; laws of cooling. Theory of exchanges; methods of measuring radiation. Laws of thermodynamics; simple applications.

Light.—Velocity of light. Illumination, Photometry. Achromatism in lens systems; direct-vision spectroscopy.

The wave theory; simple interference phenomena. Huygen's principle. Explanation of straight line propagation, reflexion, and refraction of light. Action of mirrors, lenses, etc., reviewed from this standpoint. Simple diffraction phenomena. Gratings and wave-length determination. Spectrum analysis; Doppler's principle. Double refraction and polarization of light; rotatory polarization; simple applications.

Magnetism.—Forces on a magnet in a magnetic field. Determination of axes and moment of magnet. Magnetic potential, level surfaces. Interaction of two short magnets; determination of field strength. Magnetic shell; its potential energy in magnetic field. Total normal induction. GAUSS' theorem; number of lines of force. Magnetic induction in iron, etc. Theory of magnetism.

The magnetic field of the earth; the elements and their variations; the compass and its corrections.

Electricity.—Electric capacity; specific inductive capacity. Distribution of electricity on surface of conductors; images. Value of electric force in simple cases of distribution. The mechanical force on charged conductors; energy of electrified systems. The dielectric medium; dielectric displacement currents.

Wheatstone's bridge; specific resistance; resistance thermometers. Conductivity of electrolytes; ionization; migration phenomena; accumulators. Standard cells; the potentiometer system of measurement. Thermo-electricity; application of thermo-dynamics; thermo-electric diagrams. Electro-magnetic induction; coefficients of induction; induction coils. Energy of circuit carrying current when placed in a magnetic field; mechanical force on conductors carrying current; moving coil instruments. Lenz's Law; illustration from dynamos and motors, etc. Determination of current resistance, E. M. F. in absolute measure. The discharge of a condenser; electric waves. Elementary theory of the electron.

The elementary theory of the continuous current dynamo and motor, and of the alternating current dynamo. General principles of the application of electricity to lighting, power-transmission, telegraphy, etc.

Sound.—The transmission of energy through material media by wave-motion; speed of propagation of waves of permanent type. Nature of musical sounds; pitch; scales. Reflection and refraction of sound; influence of wave-length. The vibration of strings, bars, plates and gas columns; resonance. Interference and diffraction phenomena. Analysis of sound. Measurement of wave-length, velocity and pitch.

(b) (2).—*Chemistry and Metallurgy.*

(i) General Inorganic and Organic Chemistry, including chemical theory.

(ii) The chemistry of metals (omitting the rare metals) treated more fully and including the more elementary metallurgical processes.

The syllabuses are given below:—

(i) *Chemistry, Inorganic, including Chemical Theory.*—Methods of determining equivalent, atomic and molecular weights; the atomic theory; valency; properties of gases; transition from gaseous to liquid state; vapour pressure and boiling point; osmotic pressure; theory of electrolytic dissociation; electrolysis; relation of chemical energy to electrical energy and to heat; law of mass action; catalysis; relation of physical properties to chemical constitution.

The descriptive portion will include the elements and their compounds studied from the standpoint of the periodic classification, omitting the rare metals.

The elements of Organic Chemistry.—The composition and relations of some of the typical carbon compounds; isomerism; polymerism; purification of organic substances; distillation; crystallization; criteria of purity; boiling point; melting point; methods of ultimate analysis of organic compounds; calculation of molecular weight from empirical formulæ; constitutional formulæ. Methane; ethane; ethylene, acetylene; methylchloride; methylene dichloride; chloroform; bromoform; iodoform; carbon tetrachloride; methyl alcohol; ethyl alcohol; ether; formaldehyde; acetaldehyde; chloral; formic acid; acetic acid; butyric acid; stearic acid; esters; simple amines; oxalic acid; malonic acid; succinic acid; glycerol; the fats; lactic acid; tartaric acid; citric acid; the carbo-hydrates; starch; benzene; toluene; chlorobenzene; nitrobenzene; aniline; benzenesulphonic acid; diazobenzene; benzaldehyde; benzoic acid; benzyl alcohol.

(ii) A. Outlines of the main metallurgical processes of the following metals, their chief uses and tests:—

Sodium, Potassium, Copper, Silver, Magnesium, Calcium, Zinc, Nickel, Bismuth, Mercury, Aluminium, Tin, Lead, Antimony, Iron, Chromium and Manganese.

B. General metallurgy of iron—Blast furnace; grading of pig iron; manufacture of wrought iron; effect of carbon, silicon, sulphur and phosphorus on cast iron; cement—steel; shear steel; crucible steel; detailed consideration of effect of carbon, silicon, sulphur, phosphorus, nickel, manganese, chromium, tungsten, molybdenum and vanadium on steel; Bessemer Process; Open-hearth process; Electrical furnaces for steel making.

C. Introduction to the study of Metallography—Solid solutions; Eutectics; Hardening; Annealing; Tempering; Alloys; Brasses; Bronzes. Welding of metals.

D. Electric Furnaces.

E. Electroplating.

F. Rusting and corrosion of metals.

G. Boiler water—Hardness of water; methods of softening.

(b) (3)—*Prime Movers.*

Fuel, Gas Plants and Boilers—

(a) *Fuel.*—Coal, wood, petroleum, gas, petrol, alcohol, etc., physical characteristics; approximate chemical composition; heat of combustion.

(b) *Gas Plants.*—Gas-Producers; pressure and suction plants; arrangement and working.

(c) *Boilers.*—Draught; natural, forced and induced. Ordinary forms of stationary, locomotive, marine water-tube and other types; heating surface, fire-grate area; boiler efficiency; superheaters; feed-water heaters; accessories and management.

Theory of Heat Engines—

(a) Thermodynamical principles; Carnot's cycle; perfect heat engine; second law.

(b) *Air Engines.*—Stirling and other forms.

(c) *Internal Combustion Engines.*—Gas, oil and petrol engines; engines with fluid pistons; types and working; features of cycles. Proportioning of mixtures; efficiencies.

(d) *Steam.*—Thermodynamics of the generation, expansion and condensation of steam; heat-diagrams, etc.

(e) Steam Engines and turbines, with special reference to modern developments.

(f) *Refrigerating plant.*—Theory and general arrangement of the more common types.

(g) *Air Compressors.*—Theory of pneumatic working.

Generating Plants, Accessories and Details—

(a) General arrangement and construction of the more important types.

(b) Condensers, air-pumps, circulating pumps, cooling tanks, etc.

(c) Carburettors and systems of ignition.

(d) Cylinders, pistons, cross-heads, guides, connecting rods, cranks, governors, fly-wheels, valves and valve gears, glands and pipes.

(e) *Engine-Testing.*—Consumption of steam and fuel, gas and oil; brakes and dynamometers; indicators and indicator diagrams.

(b) (4)—*Hydraulics and Hydraulic Machines.*

Hydraulics.—Definitions relating to flow of water; stream-line motion. Bernoulli's theorem. Venturimeter.

Flow of water through small and large orifices; drowned orifices; sudden enlargements and contraction in flow of water. Time of emptying tanks. Flood absorptive capacity of tanks.

Flow of water over notches and weirs.

Flow of water through pipes; hydraulic gradients; losses of head due to bends, contractions and sudden enlargements; losses of head through siphons. Impacts at bends and thrust-blocks.

Flow of water in open channels and in pipes; Chezy, Basin, Kutters and other formulæ and their applications; cross-sections of greatest efficiency.

Calculations of afflux and back-water curve.

Gauging the flow of water in open channels; water-meters.

NOTE.—There will be no practical examination in any of the subjects.

Hydraulics and Hydrostatics of weirs and other canal works.

Hydrokinetics; uniform and steady flow; stream-line and turbulent motion. Bernoulli's theorem and its application.

Discharge through orifices and mouth pieces, and over notches and weirs. Variable heads. Laws of fluid friction. Head lost due to friction.

Hydraulic Machinery.—Impact of water on fixed and moving vanes. Turbines; impulse and reaction. Description of different types of turbines. Determination of vane-angles.

Efficiencies of turbine plant. Governing.

Pumps.—Reciprocating centrifugal and turbine.

APPENDIX IX.

REGULATIONS FOR THE MEDICAL EXAMINATION OF CANDIDATES FOR ADMISSION INTO THE MECHANICAL ENGINEERING, TRANSPORTATION (POWER), ELECTRICAL ENGINEERING AND SIGNAL ENGINEERING DEPARTMENTS OF THE SUPERIOR REVENUE ESTABLISHMENT OF STATE RAILWAYS.

(These regulations are published for the convenience of candidates and in order to enable them to ascertain the probability of their coming up to the required physical standard. But it must be clearly understood that the Government of India reserve to themselves an absolute discretion to reject as unfit any candidate whom they may consider, on the report of the Medical Board, to be physically disqualified for the Railway services; and that their discretion is in no respect limited by these Regulations.)

1. To be passed as fit for an appointment as an officer of the Mechanical Engineering, Transportation (Power), Electrical Engineering and Signal Engineering Departments, a candidate must be in good mental and bodily health and free from any physical defect likely to interfere with the efficient performance of the duties of his appointment.

2. In the matter of the correlation of age, height and chest-girth of candidates of Indian (including Anglo-Indian) race, it is left to the Medical Board to use whatever correlation figures are considered most suitable as a guide in the examination of the candidates.

NOTE.—The following table of correlation of age, height and chest-girth is to be used as a guide in the examination of candidates of European race:—

Physical Equivalents.

Age last birthday.	Height without shoes.	Girth when fully expanded.	Chest range of expansion not less than.
		Inches.	Inches.
16	60 and under 62 inches	32½	2
	62 " " 65 "	33½	2
	65 " " 68 "	33½	2
	68 " " 72 "	34	2
	72 and upwards	34½	2
17	62 and under 65 inches	33½	2
	65 " " 68 "	34	2
	68 " " 72 "	34½	2
	72 and upwards	35	2
18	62 and under 65 inches	34	2
	65 " " 68 "	34½	2

- (f) that he is not ruptured;
- (g) that he does not suffer from a severe degree of hydrocele, varicocele, varicose veins or piles;
- (h) that his limbs, hands and feet are well formed and developed, and that there is free and perfect motion of all his joints;
- (i) that he does not suffer from any inveterate skin disease;
- (j) that there is no congenital malformation or defect;
- (k) that he does not bear traces of acute or chronic disease pointing to an impaired constitution; and
- (l) that he bears marks of efficient vaccination.

When any defect is found it must be noted and the medical examiners should state their opinion as to whether or not it is likely to interfere with the efficient performance of the duties which will be required of the candidate. If the condition is remediable by operation it should be so stated.

ANNEXURE TO APPENDIX IX.

Minister-in-charge: The Hon'ble Sir P. C. Mitter, Kt., C.I.E.

No. 4950 L.S.-G.—The 4th December 1927.—In exercise of the power conferred by section 5 of the Bengal Village Self-Government Act, 1919, (Bengal Act V of 1919) and after consideration of the views of the Murshidabad District Board and the Kandi Local Board, the Government of Bengal (Ministry of Local Self Government) are pleased to direct that each of the following local areas in thanas Barwan, Bharatpur, Kandi and Khargram in the Kandi subdivision in the district of Murshidabad shall be declared a union for the purpose of the Act.

2. In exercise of the power conferred by sub-section (1) of section 6 of the said Act, the Government of Bengal (Ministry of Local Self-Government) are pleased to establish Union Boards for each of the unions hereby declared and to fix nine as the number of members of each Union Board.

3. In exercise of the power conferred by sub-section (3) of section 6 of the said Act, the Government of Bengal (Ministry of Local Self-Government) are pleased to direct that one-third of the members of each Union Board shall be appointed by the District Magistrate on the grounds that the electors are inexperienced, and that such appointment is necessary for the due representation of minorities.

4. This cancels Notification No. 4180 L.S.-G., dated the 8th September 1921.

West—Then along the Setikhola northwards the eastern boundary of Senchal Block V till it meets the Pillar No. A the starting point.

The Governor in Council is pleased to appoint the Deputy Commissioner, Darjeeling, to be the Forest Settlement Officer, who will, under provisions of Chapter II of the Indian Forest Act, enquire into and determine the existence, nature and extent of any rights alleged to exist in favour of any person in or over any land comprised within the boundaries specified above.

The Governor in Council is also pleased, under section 16 of the Indian Forest Act, to appoint the Commissioner of Rajshahi Division to hear appeals from the decisions of the Forest Settlement Officer as above appointed.

F. A. SACHSE,

Secretary to the Government of Bengal.

EXCLUDED AREA.

No. 18009 E.A.—*The 17th December 1927.*—In exercise of the power conferred by sub-section (1) of section 351-B of the Bengal Municipal Act, 1884 (Bengal Act III of 1884), the Governor in Council proposes to make the following amendments in the rules contained in schedule "C" of the said Act relating to the use of building-sites and the execution of building-work within the Darjeeling Municipality :—

Amendments.

I. *Substitute* the following for rule 4 :—

"4. (1) **Height of building.**—Except in special sites where, in the opinion of the Commissioners, the conditions are such that the provisions of this rule may be relaxed, the height of a building shall be regulated by the width of the surrounding open space in the same holding *plus* the width of the road or roads, if any, in the following manner, namely :—

- (i) if such width in any direction be *twenty* feet or *less*, the height of the building shall not exceed fourteen feet in that direction ;
- (ii) if such width in any direction be over twenty feet, but *under* twenty-eight feet, the height of the building shall not exceed twenty-three feet in that direction ; and
- (iii) if such width in any direction be *twenty-eight* feet or *over*, the height of the building shall not exceed thirty feet in that direction.

(2) In every case in which the provisions of sub-rule (1) are relaxed the materials and method of construction of the building must be such as may be prescribed by the Commissioners."

II. *Substitute the following for rule 18:—*

"18. (1) **Free passage about dwelling-houses.**—Except in special sites where, in the opinion of the Commissioners, the conditions are such that the provisions of this rule may be relaxed, no dwelling-house or part thereof shall be erected, re-erected or extended so that any portion thereof is in any direction at a distance less than—

- (a) ten feet from any part of any adjacent building ;
- (b) three feet from the toe of any bank or-retaining wall ; and
- (c) ten feet from the boundary of the holding on which the house stands, except in the case of public roads of over ten feet in width the distance shall be four feet, but in the case of roads of ten feet width or less, the distance shall not be less than ten feet from the centre of the road :

Provided that godowns erected in continuation of the main building shall, for the purpose of this rule, be considered part and parcel of that building.

(2) The provisions of sub-rule (1) shall not be relaxed unless the Commissioners are satisfied that notice of the intention to build has been given by the applicant to the neighbouring proprietor or his agent who will have the opportunity of raising an objection to such relaxation on sanitary or public grounds.

(3) In every case in which the provisions of sub-rule (1) are relaxed the Commissioners shall send a copy of the order both to the applicant and to the said neighbouring proprietor."

Orders and Notifications by the Government of India republished for general information.

LEGISLATIVE DEPARTMENT.

NOTIFICATIONS.

New Delhi, the 6th December, 1927.

No. 86-I/27-C & C.—The following Interim Report of the Delegates of India to the Eighth Assembly of the League of Nations is published for general information:—

To the Right Honourable the EARL OF BIRKENHEAD, His Majesty's Secretary of State for India.

MY LORD,

We beg to submit our Report on the Eighth (Ordinary) Session of the Assembly of the League of Nations held at Geneva from the 5th to the 27th September, at which we had the honour to represent India.

2. Following the precedent of previous years we have prepared an Interim Report, because we feel that those to whom we are responsible, and the public in India, are entitled to early information of our proceedings, and because the preparation and printing of the complete record of the work of the delegation, will necessarily take a considerable time. This report, therefore, consists of a survey of matters of general interest, and a description of those in which the interests of India are affected, and of the part played by delegates of India in the discussions. The Final Report will reproduce the bulk of this report, together with the text of the Resolutions adopted by the Assembly, and certain reports of Committees and speeches.

The Indian and British Empire Delegations.

3. Numerically the Indian Delegation was the same as last year, but we had the advantage of including among us four members—His Highness the Maharaja of Kapurthala, Sir C. P. Ramaswami Ayyar, Sir Edward Chamier and Sir B. K. Mullick—who had had previous experience of the work of the Assembly. We held no meeting of the Delegation before leaving London, on account of the practical difficulty of

assembling a sufficient number of delegates. On most occasions such a meeting would be desirable, if not necessary, but on this occasion there was in fact no question of outstanding importance affecting India except the resolutions of the Economic Conference, and the majority of us were generally familiar with the position and were not in need of guidance on matters of practice and principle. A meeting of the Delegation was held on the day on which we reached Geneva, and on the same day we attended a meeting of all the Delegations of the British Empire convened by the leader of the British Delegation, Sir Austen Chamberlain. Throughout the period of the Assembly we maintained coherence among ourselves by meetings of the Delegation and otherwise, and co-ordination was effected between the Empire Delegations by meetings of leaders and by meetings of the delegates who represented the Empire Delegations on the several Committees. It will be obvious that the Delegations of the British Empire exercise a very great influence in the League so long as they are united, and on the big political questions in which other groups of Powers who are not united by an Imperial bond such as ours act in concert, it is especially desirable that the British Empire should pursue a single policy. The Indian Delegation is not constitutionally in the same position as those of the Dominions, but we believe that the obligation to make the action of the Indian Delegation conform to that of the British Delegation is practically confined to those questions on which the Empire Delegations must of necessity, and in fact do, act together, and that Indian policy is determined on independent lines in those matters in which India really possesses an independent interest. Moreover, those problems of a political character in which the attitude of India might be affected by her present constitutional position are predominantly of an European character and have little direct interest for India, whereas those departments of the work of the League in which India has the greatest practical interest are scarcely, if at all, influenced by political and constitutional relations. It follows accordingly that, in our view, the actual liberty of the Indian Delegation to follow an independent policy corresponds to the liberty which the Indian Delegation would in fact exercise if the constitutional status of India within the Empire were different.

Opening of the Eighth Session.

4. The proceedings of the Assembly were opened on the 5th September by His Excellency M. Enrique Villegas (Chilian Ambassador at Rome and representative on the Council of the League), acting as President of the Council. The credentials of the delegates were verified by a Committee on which His Highness the Maharaja of Kapurthala served. A list of the members of each Delegation will be found in our Final Report.

5. Forty-nine States were presented out of a total number of 55 States, Spain, Brazil, and certain other South American States being absentees. The Assembly was attended by a larger number of Foreign Ministers (21) than has ever previously been present, by the President of the Swiss Confederation, and by the Prime Ministers of Luxemburg and Lithuania. His Excellency Dr. Alberto Guani (first delegate of Uruguay) was elected President after a close contest, in which His Excellency Count Mensdorff (the first delegate of Austria) was the other candidate. The election of Vice-Presidents, members of the General Committee and of the Agenda Committee proceeded in accordance with the usual routine which has been described in reports of previous delegations.

6. The Assembly opened in an atmosphere of some uncertainty and even depression as to the present position and future outlook of the League. This atmosphere had been precipitated by the resignations not long before the date on which the Assembly met of Viscount Cecil and M. de Jouvenel from the British and French Delegations respectively. These resignations were taken as indicating a view that the Great Powers were showing a tendency to settle problems among themselves without resort to the League, and that too uncompromising an attitude was being adopted in regard to the great problem of Disarmament by some of those on whose attitude progress mainly depended. The general debate was expected to range over these two topics, and it was felt in many quarters that the Eighth Assembly, although having before it an agenda of no abnormal importance, might be of critical significance in regard to the future of the League. These expectations were not falsified. There were a number of subjects in which fundamental questions were treated from all points of view, and there was a tendency to precipitate dramatic developments. If some of the results which emerged were of moral, rather than of political or constitutional importance, it should be realised that the ideals on which the League is based represent a fundamental change in the practice of international politics: that such a change can only proceed with safety on evolutionary lines, and that for the purpose of such an evolution a moral stimulus may be effective when instruments of precision would be premature and dangerous. Before indicating in greater detail the lines of the debate, we shall express our belief that the general issue afforded no justification for pessimism, while at the other end of the scale it emphasised the necessity for a proper relation between ideas and facts. The need for tempering enthusiasm with patience

is, in our view, admirably expressed in the Report of the Director of the International Labour Office for 1927 which was placed before the Assembly, from which the following passage may be usefully reproduced :—

“ It is impossible not to realise the immense gulf which separates what has been achieved from what was hoped in 1919, when mankind, for a brief moment rose to heights unknown before. At that time, immediately after the great catastrophe of the war, an effort was made to organise human life on a basis of solidarity and peace, and the nations collaborated with one another in setting up a new structure. At that time almost everyone cherished the illusion that international life would at once come into being and that a new era was on the point of beginning.

“ The reality is not what was then supposed. International institutions can only establish themselves by long, obstinate and patient efforts. This has been the experience of the League of Nations as regards international security and disarmament. The apprehensions and anxieties which have been deeply rooted in the heart of mankind by centuries of war cannot be uprooted all at once. The sovereign States are still inclined to rely on themselves for securing the necessary guarantee of security.”

7. Although these political and constitutional subjects dominated the debate, many speakers concerned themselves with pointing out that other subjects might be regarded as of no less importance; that for non-European Members these subjects might even be of greater importance, and that while there might be an apparent and temporary lack of success in the League's treatment of political subjects, notable successes in the non-political spheres of activity did much to restore the balance. Conspicuous among these is the success of the International Economic Conference of last May, and other spheres in which valuable work has been, or is in course of being, done are those of Health, Intellectual Co-operation, International Law and Social Reforms.

Speech of Sir C. P. Ramaswami Ayyar.

8. The General Debate in the Assembly was opened by Sir C. P. Ramaswami Ayyar, in a speech which emphasised this aspect of the work of the League. The text will be found in our Final Report, but we will reproduce here a summary.

9. After congratulating the Secretary-General and his staff on the comprehensiveness and thoroughness of which the documents before the Assembly were an indication, he referred to the unique position of India in the League, and spoke of the effect which the world opinion developed by the League might have upon India. He said that the quest of the ideal was one of the strongest characteristics of his race, and that as an Indian he felt at home in an Assembly which expected and indeed assumed the existence of idealism in all its members. While appreciating the value to his own country of its participation in the League, he expressed the hope that the presence of delegates from India and other distant countries was of some value to the League by preserving its character of universality and marking the distinction between a real League of Nations and a mere concert of Powers. He then referred, with examples, to the way in which India had been fulfilling in practice the ideals of the League. It was a matter for sincere congratulation that the League was in its turn realising the importance of Indian and eastern problems. But it was not easy for his countrymen, remote and absorbed in their own problems, to realise in a concrete way how the ideals of the League were being converted into practice, and he would welcome any increase in the relations between the practical work of the League and the actual interests of India. He stated his belief that it was through the technical organisations of the League that the ideals of the League could be most adequately realised in the non-European countries, and he therefore proceeded to deal in some detail with its work in the spheres of health and economics. He spoke of the importance of the Health Organisation, and in particular of its Bureau at Singapore, in assisting the control of epidemics, and he welcomed the projected tour in India of medical officers associated with the League as the first occasion on which a League organisation would come into direct personal contact with India, a contact from which he anticipated valuable results, both from the technical and from the wider aspect. He emphasised the special interest of India in the work of the Economic Conference from which the important and extremely encouraging fact had emerged that in spite of the diversity of theories and the legitimate national sentiments of those who took part there was a unanimous desire that the Conference should mark the beginning of a new era in international commerce. He referred to the present fiscal policy of India and showed that it was harmonious in principle with the conclusions of the Conference. He greatly hoped that the attitude of the League towards the work of the Conference would demonstrate its interest in the problems and conditions of countries far removed from the scene of European economic life, but forming nevertheless important factors in the sum total of world economy. He finished by saying that India was not only content but most willing and anxious to take part in the labours of the League.

The Technical Work of the League.

10. The position which this speech occupied in the order of the debate assured it of the attention which it deserved, and we believe that it, together with speeches made by members of the Indian Delegation later on in the Second Committee, did much to fortify the position of India in regard to an effective participation in the technical work of the League, which is, as we have already indicated, that part of the League's work most directly beneficial to India in present circumstances. There were other speakers also who set themselves to emphasise the success as well as the importance of the League's technical activities, and particularly those in the economic sphere. Chief among them was the British delegate, Sir E. Hilton Young, who opened his speech by saying that the indirect attack upon the economic problem might be of equal importance to the cause of peace as the direct enforcement of security. It was a dramatic revelation, he said, that in the material sphere, as in the ideal sphere, there was no necessary conflict between the interests of nations, and he considered that the results of the Economic Conference were welcome because they expressed the ideas which were fundamental in the League, the ideas of harmony between nations. They not only expressed these ideas but gave them the most practical assistance in pointing out the path which would lead away from war. It was not always the most direct path which led straightest to a given objective. The course of disarmament, of direct reduction of military armaments, seemed to be crossed by some very difficult precipices, but there were skilled guides to show the way round. He asked whether it was not possible that the skilled guides of the Economic Conference were actually showing what is the path by which permanent and established peace would be achieved sooner and more directly than by any straight proceeding through difficult country. The instincts of hostility which led to war were the resultant of many different causes, and amongst them economic causes were not the least. The League could have no higher or more direct occupation than to attempt to get rid of that economic strain which was the direct outcome of the causeless fears left by the war.

Relation of Greater and Smaller Powers.

11. We must now describe briefly the main currents of the debate on political topics. In the first place, there was some tendency to suggest that the events of the last year had indicated an increase in the relative disparity of the authority exercised respectively by the Great Powers, that is to say in effect those Powers who have permanent seats on the Council, and by the main body of League Members. It was implied that there was a diminution of the effective participation of the latter in international politics owing to an increasing disposition on the part of the former either to keep certain subjects outside the League's purview or to deliberate upon them in private in such a manner that they came before the League virtually as *choses jugées*. In particular this point of view was expressed with emphasis by Mr. Hambro of Norway, who referred among other matters to the increasing preponderance of diplomats, as compared with statesmen, in representation of Governments at League meetings, and criticised the extent to which elections to appointments of authority in the Assembly were managed behind the scenes. His speech was received with interest, and evidently with a certain degree of sympathy, but we believe that the points which he made were rebutted to a large extent, and perhaps entirely, by subsequent speakers to the satisfaction of the Assembly as a whole. The best answer to his general complaint was supplied by M. Motta, President of the Swiss Confederation, who said that he had never favoured the endeavours of those who wanted to set the small nations against the great, or to sow seeds of difference between great and small, and that he knew that the Great Powers could very well do without the League of Nations, and that it was the small nations which needed the League if they were to have any influence on international affairs. It has to be remembered, we consider, that the League gives the less powerful States opportunities of participation in international affairs which they never enjoyed before and would never enjoy otherwise. Under the Covenant each State represented at the Assembly has one vote and no more than one vote, but it is necessary to appreciate the inevitable fact that that vote cannot be exercised by all with equal freedom and authority. We believe that those in India who are qualified by a knowledge of facts to appreciate the position from the point of view of India will be disposed to agree rather with M. Motta than with Mr. Hambro. Mr. Hambro referred to a view that the General Debate in the Assembly on the Annual Report on the work of the Council was tending to become an exchange of complimentary banalities and that Members of the Council preserved silence in the Assembly on any comments that were offered. If that has ever been true, it was certainly not true of the Eighth Assembly. No important voice was silent. The debate was searching and frank in its mode and lacked nothing in range.

Elections to Council.

12. At this point it is relevant to mention the election of non-permanent Members of the Council, because the result is an indication of the effective assertion of their views by the lesser Powers. Under the rules adopted last year non-permanent seats

are tenable for three years, and the three States which retire from the Council each year must normally wait for three years before being eligible for re-election. But a retiring State may be declared eligible for immediate re-election by a two-thirds majority of the Assembly. Of the three States which retired this year, Belgium, Czecho-Slovakia and San Salvador, the first named applied for a declaration of re-eligibility and it was known that her application was regarded with favour by Great Britain, France and Germany on the ground that the presence on the Council of all the Locarno Powers was desirable. The application failed because of the evident determination of the lesser Powers to make the principle of rotation a reality. Consequently Cuba, Finland and Canada were elected. The election of Canada is notable because this is the first occasion on which a Dominion member of the British Empire has acquired a seat on the Council.

Assembly Debate on Arbitration, Security and Disarmament.

13. We have now to deal with the subject of Disarmament, with which are associated those of Arbitration and Security. It will be remembered that at its Seventh Ordinary Session in September 1926, the Assembly adopted a resolution requesting the Preparatory Committee on Disarmament, appointed in 1925, to hasten the completion of its work so that it might be able to draw up a programme for a Conference on Disarmament early in 1927. The Conference has not yet been convened, but much useful work has been done. The Preparatory Committee has prepared what has been called a "first reading" draft of a Convention on Disarmament, though it has not been able to secure anything like unanimity on several of the most important points. It has also devoted much time to the consideration of such subjects as the working of the organs of the League in times of crisis, technical methods for the reduction and limitation of armaments, and the relations between the economic and military resources of States, and to special questions such as chemical warfare, civil aviation and defence budgets.

14. At the opening of the Assembly this year it seems to have been felt by many that little more could be done by the Preparatory Committee until greater international security had been attained, and most of the proposals that were put forward in the Assembly and in the Third Committee were designed to deal with this difficulty. At the third meeting of the Assembly the Dutch Delegation submitted a draft resolution to the effect that the time had come to resume the study of the principles on which the Geneva Protocol of 1924 was based, and it was suggested that the study of those principles along with the report of the Preparatory Committee on Disarmament should be referred to the appropriate Committees of the Assembly. It will be remembered that the Geneva Protocol of 1924 was designed to secure compulsory arbitration in international disputes if conciliation by the Council failed, and to provide for individual and collective action by States at the request of the Council against a recalcitrant State. This proposal received some support in the Assembly, but several Delegations objected to it on the grounds that it would inevitably reopen the discussions of 1924, that there was no hope of agreement, and that the proposal would probably do little more than call attention once more to the reasons why several States had been unable to accept the Protocol. Sir Austen Chamberlain stated that the British Government was still unable to accept compulsory arbitration of the kind contemplated by the Protocol or to undertake responsibilities such as the Protocol would lay upon the British Government. The Dutch Delegation then modified their proposal by substituting "the principles of arbitration, security and disarmament" for "the principles of the Geneva Protocol." So modified the Dutch proposal was referred to the Third Committee for consideration. There was also referred to the Third Committee a proposal by the Polish Delegation that the Assembly should record a declaration that all wars of aggression are and always shall be prohibited, that every pacific means must be employed to settle disputes of every description which may arise between States, and that States Members of the League are under an obligation to conform to these principles. Many Delegations pointed out that this resolution would add nothing to what was already contained in the Covenant, but others maintained that a solemn declaration of this kind was of great value. In deference to the views of the latter the Third Committee accepted the proposal and the Assembly passed a resolution accordingly.

15. The debate in the Assembly was of intense interest, and all aspects of the question were frankly and fully deliberated. It would be impossible to summarise the discussion briefly, and we must content ourselves with indicating some of its leading features. Jonkheer Beelaerts van Blokland, the first delegate of the Netherlands, referring to the Dutch resolution which we have alluded to above, reminded the Assembly that in 1926 the first delegate of the Netherlands had used the following words: "The Protocol is not dead; it is most certainly not buried; it but slumbers. Do not let us seek now to remodel or perfect it, rather let it rest." He said that, while these words were fully justified and entirely reasonable on the eve of the conclusion of the Locarno Treaties, he thought that if this state of rest were to be prolonged it might degenerate into lethargy. It was necessary to continue the study of the important principles underlying the Protocol, and the Assembly must realise that public opinion in different countries was moving in this direction, and that, particularly

in overseas countries, there was a growing current of opinion which had adopted as its watchword "The outlawry of war." The principle of compulsory international jurisdiction was a necessary complement of these ideas, but if this end was to be achieved the Great Powers must not continue to shirk obligations. The speech of the Dutch delegate and the resolution which he moved profoundly influenced the current and character of the subsequent debates, and it is a conspicuous example of the part played by the lesser Powers in the Eighth Assembly. M. Politis, the Greek delegate and one of the authors of the 1924 Protocol, said that, if he had rightly understood the speech with which the Dutch proposal was introduced, the purpose in view was to revert to the idea of general compulsory arbitration. This would be the idea of the Protocol, with its fundamental basis of compulsory arbitration but without the system of sanctions. He did not believe that, in the present state of affairs, it would be wise or practicable to bring up the Protocol again, this belief being based on the fact that the obstacles which wrecked its progress before were still unchanged. Circumstances hardly warranted the hope that there was at present any likelihood of overcoming the obstacles to compulsory arbitration, and even if that were not so he could not conceive of compulsory arbitration as an element of security unless accompanied by an adequate system of sanctions. The cause of the Protocol would be hindered rather than served if a demand were made to take it up in fractions or segments, and he thought that the counsel of wisdom was to wait patiently in the belief that public opinion would soon declare itself in a manner which would enable the Protocol to emerge as an international reality. He went on to say that if security was a necessary preliminary to disarmament, and if security itself was founded on justice, justice in its turn was based on the existence of law, and he therefore attached great importance to the work which the League had done and would continue to do in the development and enrichment of international law.

16. Dr. Stresemann, the German Foreign Minister, said that he could not be content with the pessimistic policy of waiting which had been advocated by M. Politis. He could not believe that the proposal of the Polish Delegation for a solemn declaration prohibiting all wars of aggression if adopted by the Assembly would have no effect on the present situation. Many might prefer to work by means of Conventions having binding force, but he felt that faith in an ideal could be as important as a legal formula. It was not the mere clauses of a treaty which brought about peace, but the spirit of the peoples and the consciences of their responsible leaders. As evidence of the belief of the German Government in arbitration, he intended during the present session of the Assembly to append his signature to the optional clause of the Statute of the Permanent Court of International Justice. A promise had been made that the disarmament of the nations which were vanquished in the war should be a preliminary to general disarmament, and he appealed to the Assembly not to betray the faith which had been placed in the sanctity of this pledge. Dr. Stresemann further developed the German view in regard to disarmament in a speech in the Assembly after the report of the Third Committee had been presented. He said that Germany was emphatically of opinion that the commencement of general disarmament should not be dependent on fresh guarantees of security, which was indeed the standpoint of the Assembly of 1926. He welcomed the resolutions of the Third Committee as being a satisfactory result of difficult negotiations. Every step forward in general disarmament would itself provide fresh elements of security for the whole world. Armaments could not, and should not, form the basis of security, and they were not even the most effective protection. The success of Germany in overcoming the psychological difficulties of disarmament presented by her great military traditions ought to make it easier for other countries to follow suit. He concluded by saying that the entire institution of the League could not live and be effective until the duty of general disarmament had been discharged and until in consequence the conditions necessary for that atmosphere required for a common and collective guarantee of peace had been fulfilled.

17. M. Briand made a speech such as the Assembly has learnt to expect of him, which appeared to be designed rather to create a favourable atmosphere and to restore confidence than to make any precise or concrete contribution to the subject matter of the debate. He said that the strength of the League lay in the trust of the peoples; they did not always reason, but they had an instinctive feeling of trust in the League; they knew that without the League there was always the danger of a renewal of strife. Alluding to the speech of M. Politis, he said that the peoples were prepared to wait, but not to wait indefinitely.

18. Sir Austen Chamberlain, who was the last of the representatives of the Great Powers to speak in the opening debate, said that Great Britain had proved by her deeds her desire to see a real and large reduction of armaments; the British Army had been reduced immediately peace was secured to less than its pre-war level, and the British Fleet could not be compared with the Fleet which Great Britain had maintained not merely during the war but before the war. Turning from disarmament to arbitration, he asked the Assembly to bear in mind the special conditions of the British Empire, which was not a unitary system of government, such as prevailed in other countries, but a great community of free and equal nations, each autonomous, united in the oldest League of Peace in the world. It was not easy for such an Empire to accept obligations which could be readily undertaken by a homogeneous State speaking with the voice of a single Government. He claimed that Great

Britain had arbitrated more grave problems than any other country in the world, and gave as a special instance the case of the Iraq frontier, in which Great Britain had used the verdict which had been given in her favour to open negotiations with Turkey and to make acceptable to her an award which could have been rigidly enforced. Passing on to security, he said that Great Britain had not merely accepted all the obligations of the Covenant, but had also become parties to the Locarno Agreement, knowing what it was to give a guarantee and the cost of keeping a guarantee. He asked whether other parties could not accept liabilities similar to those accepted at Locarno with a view to guaranteeing other troubled frontiers in the same way as Great Britain had guaranteed the western frontiers of France. Those who asked Great Britain to guarantee every frontier as she had guaranteed one in the Treaty of Locarno were asking her to undertake an obligation which was beyond her strength. All parties did not look upon the League in the same way; their faith was the same and their purpose was the same, but the way in which they would reach their purpose varied with their circumstances, their temperaments and their responsibilities. In the organic world it was not those organisms which came most quickly to maturity that reached the greatest strength or lasted the longest; and he regarded the League in the light of this analogy.

19. This speech naturally made a deep impression and had a decisive influence in ensuring that the subsequent discussion, which might otherwise have wasted itself in theory and idealism, was directed into channels calculated to lead to important practical results. Dr. Nansen, of Norway, in a speech in the Assembly on one of the last days of the session, paid a notable tribute to the force and conviction of Sir Austen Chamberlain's speech. He said that no one who had worked at Geneva had failed to realise that Great Britain, since the beginning of the League, had given the most consistently powerful support to it and its existing provisions. If Great Britain had hesitated to increase those commitments, they all realised that it was chiefly because she took those commitments so seriously and that she was anxious not to weaken her power to honour existing engagements by contracting new ones. They also realised the special position of Great Britain and of the Empire, and also the fact that owing to the British Navy any additional commitments in regard to arbitration and sanctions would be more onerous for Great Britain than for other countries. Even if they might regret the course which events had taken, they understood the reasons which in a large measure determined it. It is an important fact that Governments of the British Empire should thus receive recognition of their policy of not accepting obligations unless they fully intend and are assured of their ability to carry them out scrupulously. India, we believe, can claim to enjoy this reputation as much as any other part of the Empire.

Sphere of Action of the League.

20. At the Seventh Assembly Viscount Cecil had proposed that a Committee should be appointed to consider and report what questions are, and what are not, within the sphere of action of the League, within the meaning of the Preamble to, and Articles III and IV of, the Covenant. Lord Cecil had explained that this proposal was not animated by any desire to restrict or diminish the legitimate activities of the League; but it was felt in some quarters that there was a tendency which should be checked, to encourage the League to take up subjects which were foreign to the purpose for which it was founded, *viz.*, to secure international co-operation making for the peace of the world. The proposal to set up a Committee was not accepted, and the Seventh Assembly not being able to agree upon any alternative formula, decided that the question should be postponed for further consideration at the Eighth Assembly. But before the Eighth Assembly opened the British Government informed the League that they believed that the consideration which the matter had already received had to a large extent met their object, and lessened the probability of the recurrence of those dangers to which attention had been called. In these circumstances they proposed that the question should not be further pursued for the present. Accordingly no further discussion occurred at the Eighth Assembly. We think that the ventilation of the question has undoubtedly been useful in creating a public opinion which will cause each new proposal for an extension of the League's operations to be carefully scrutinised. This was evident on several occasions this year, and notably when the proposal for taking up the question of alcoholism came before the Second Committee.

Work of the Six Committees.

21. We now turn to the work of the six Committees which were constituted as follows in accordance with precedent:—

COMMITTEE I.

Legal and Constitutional Questions.

Chairman: Monsieur Adatei (Japan); *Delegates of India:* Sir Edward Chamier, Sir B. K. Mullick.

THE CALCUTTA GAZETTE, DECEMBER 22, 1927.

COMMITTEE II.

Technical Organisations.

Chairman: Mr. Dandurand (Canada); *Delegates of India:* Earl of Lytton, Sir C. P. Ramaswami Ayyar, Sir Fazl-i-Husain.

COMMITTEE III.

Reduction of Armaments.

Chairman: Dr. Benes (Czecho-Slovakia); *Delegates of India:* Earl of Lytton, His Highness the Maharaja of Kapurthala, Sir Edward Chamier.

COMMITTEE IV.

Financial Questions.

Chairman: Jonkheer van Eysinga (Netherlands); *Delegates of India:* Sir C. P. Ramaswami Ayyar, Sir Fazl-i-Husain.

COMMITTEE V.

Social and Humanitarian Questions.

Chairman: Mr. Hambro (Norway); *Delegates of India:* Earl of Lytton, His Highness the Maharaja of Kapurthala, Sir B. K. Mullick.

COMMITTEE VI.

Political Questions.

Chairman: Monsieur Bech (Luxemburg); *Delegates of India:* His Highness the Maharaja of Kapurthala, Sir B. K. Mullick.

COMMITTEE I.—Legal and Constitutional Questions.

22. The First Committee dealt with various matters of a technical character, including the legal aspect of certain of the proposals submitted to the Third Committee in regard to Disarmament, Arbitration and Security. But the only one of sufficient general interest to require mention in this Report is the following:—

CODIFICATION OF INTERNATIONAL LAW.

23. Last year the First Committee was unable to arrive at any definite conclusion as to the instructions to be given to the Committee of Experts appointed to consider the possibility of codifying international law, of which Sir Mohammad Rafique is a member as an expert on Moslem law. That Committee accordingly continued its work as before and in April 1927 presented a report to the Council to the effect that seven subjects were in certain of their aspects ripe for regulation by international action, namely:—

- (1) Nationality.
- (2) Territorial waters.
- (3) Diplomatic privileges and immunities.
- (4) Responsibility of States for damage done in their territory to the person or property of foreigners.
- (5) Piracy.
- (6) The procedure of International Conferences and procedure for the drafting of treaties.
- (7) Exploitation of the products of the sea.

24. The Committee of Experts recommended that subject No. 6 should in the first instance be studied by the Secretariat, and that subject No. 7 should be examined by the Economic Committee of the League or by the Permanent International Council for the Exploration of the Sea at Copenhagen, and that the Council should then consider whether any further action was possible or desirable. Doubt had been

expressed whether subjects Nos. 3 and 5 were of sufficient interest at the present time to justify the inclusion of them in the programme of an International Conference, but recommended that after the completion of such preparatory work as might be necessary, an International Conference should be convened to deal with subjects Nos. 1, 2 and 4. This report was referred by the Assembly to the First Committee.

25. After a lengthy discussion of the report and of a proposal made by the Paraguayan Delegation that a Committee of Experts should be entrusted with "the preparation of a general and comprehensive plan of codification of International Law, paying due regard as far as possible to the work of codification which is being carried on in America," the First Committee appointed a strong Sub-Committee to examine the whole subject and eventually submitted a report to the Assembly recommending that an International Conference should be convened to deal with subjects Nos. 1, 2 and 4 only, and that to that end a Preparatory Committee consisting of five persons possessing a wide knowledge of international practice, legal precedents and scientific data relating to those questions should be appointed to prepare a report detailing the bases of discussion at the Conference. The Committee recommended also that the Council should attach to the invitation to be issued to States to join in the Conference draft regulations for the procedure of the Conference indicating the general rules which should govern the discussions.

26. The Dutch Government had offered to convene the Conference and also supervise the necessary preliminary work, but the First Committee considered that this should be undertaken entirely by the League. It recommended, however, that the Council should, if possible, arrange to have the Conference held at The Hague, and expressed the hope that the Dutch Government would agree to this. As regards the method of dealing with subjects Nos. 6 and 7, the First Committee approved generally the proposals of the Committee of Experts. The Assembly passed a resolution adopting all the recommendations of the First Committee on this matter. There was, however, a considerable controversy as to the provision of funds to enable the Committee of Experts to continue its work in 1928. This is referred to later in connection with the Budget and Supplementary Estimates.

27. With reference to the proposal of the Paraguayan delegation, the Assembly, on the recommendation of the First Committee, requested the Committee of Experts to consider at its next session under what conditions the work referred to in that proposal could be undertaken, and reserved a decision as to the course to be adopted until the Committee of Experts had made its suggestions and the Council had had an opportunity of considering them. The speeches delivered in the First Committee indicated that the general opinion was that the Paraguayan proposal was too ambitious, and that in any case it was desirable to await the result of the efforts to be made to deal with the three subjects specified above before attempting anything in the nature of the general codification of International Law. But the Assembly seemed to be in general agreement with the view that the classification and extension of International Law had a close relation with the problem of security, as it would extend the scope of arbitration. In principle, therefore, the work of codification has acquired a new importance.

COMMITTEE II.—Technical Organisations.

WORLD ECONOMIC CONFERENCE.

28. The success of the Economic Conference held at Geneva in May was the most important achievement of the League in the last 12 months. We have already referred to the subject in general in our account of the opening debate of the Assembly. With the exception of the group of questions relating to arbitration, security and disarmament, this was the most vital topic on the agenda of the Eighth Assembly. Broadly speaking, the issue which the Report of the Conference raised was whether, both in principle and in practice, it would be reasonable to recognise and possible to effect in the domain of economics a closer international relationship than in the past.

29. Two main questions presented themselves, *viz.*, the degree in which the Assembly should accept the conclusions of the Conference and advocate their pursuance, and the developments which would accordingly be necessary in the economic organs of the League for the purpose of the new policy.

30. Those who wish to study the problem in detail are advised to refer to the Report of the Conference and the Report of the Indian Delegation which have been published in a convenient form in India. Many countries had already found themselves able to endorse the conclusions of the Conference and to express their intention to co-operate in carrying them into effect. This was not yet possible in the case of India for reasons which were explained in a declaration made in the Second Committee by our leader. This declaration will be reproduced verbatim in the Final Report, and the following is a summary:—

31. The Earl of Lytton said that India supported unhesitatingly the general principle that the economic policy of States should be directed towards the peace and prosperity of the world, and would welcome the elimination of any economic factors calculated to cause friction or misunderstanding. He believed there was no important

recommendation of the Conference which was inconsistent with the past or present economic policy of India, and that India on the whole stood to gain by the adoption throughout the world of the general recommendations of the Conference. If on minor points there were any inconsistencies the Government of India would seek to reconcile them. The future policy of India was likely to be as much in conformity with the recommendations of the Conference as that of the past. His inability to accept those recommendations without reserve was due not to the fact that any action was contemplated in the future which was inconsistent with them, but rather to the lack of opportunity of ascertaining public opinion in India during the short time that had elapsed since the Conference was held and the undesirability of committing the peoples of India to agreement with a document which they had not yet studied. It would militate against ultimate acceptance by India were she committed in advance of the study and discussion of the Report for which facilities were being provided. He referred to the recent grant of a large measure of fiscal autonomy to India and to the natural desire of the Indian people to guard their recently gained freedom. The policy of discriminating protection did not conflict with the principles laid down by the Conference. He had very little doubt that the Report of the Conference, when it had been fully examined by the public in India, would be found to be in general conformity with Indian economic policy, and that if the decision of India was left unhampered by premature commitments the spirit in which the Conference performed its task would be appreciated and its recommendations generally accepted.

32. A Resolution was submitted to the Second Committee by one delegate proposing to endorse the conclusions of the Conference as a whole and without reserve, but we were instrumental in influencing the form of the resolution finally adopted so that it gave satisfaction to our point of view. This resolution noted with satisfaction that many Governments had made declarations accepting the principles and stating their intention of co-operating in their application, while no declaration in the contrary sense had been made. It expressed a belief that there was every reason to hope for universal approval when the public opinion of all countries had been sufficiently instructed, and it recommended the resolutions of the Conference to the favourable consideration of all Governments, and trusted that those Governments which had not yet declared their support would shortly be able to do so.

33. The development of the economic organisation of the League had been much discussed at the Economic Conference itself, which in the end had contented itself with recording a resolution to the effect that, while offering no suggestions for a permanent organisation, it could not do better than draw the Council's attention to the well-balanced composition of the Preparatory Committee, which had achieved excellent results in the preparatory work of the Conference. The problem was referred by the Council to the Assembly, and it is a fact of some significance that it was the Assembly and not the Council which worked out the scheme of organisation described below. The possibilities ranged from a continuance of the Economic Committee in its existing form—that is to say, a committee of 14 members nominated for their personal expert qualifications—to an independent organisation on the lines of the International Labour Organisation. Each extreme had its advocates. The continuance of the Economic Committee on its existing footing was advocated on the ground of practical efficiency, while those who proposed other schemes were influenced by a desire to introduce the principle of representation, whether it should be national or functional representation, so as to secure the widest possible authority and the greatest support. The resolution which embodied the conclusions of the Second Committee was a compromise combining both ideas. The Economic Committee will be increased from 14 to 15 members and the basis of appointment will remain the same, with some modification of its actual membership. It will continue to be the organ through which the Council deals with economic affairs, and its principal work in the near future will lie within the sphere of the economic relations between States and their economic policies so far as they have international aspects. Under a new provision it will have power, subject to Council provision, and in consultation with the States in question, to name economic correspondents in countries which have no member on the Committee. In addition to the Economic Committee there is to be created an Advisory Committee, the object of which will be to follow the application of the recommendations of the Economic Conference. It will be similar in numbers, and in the equilibrium of interests represented by its members, to the Preparatory Committee for the Economic Conference, and will include persons competent in industry, commerce, agriculture, finance, transport, labour questions, and questions relative to consumption. The International Labour Office will be invited to submit the names of three Labour members, and arrangements will be made to secure the co-operation of the International Institute of Agriculture and of the International Chamber of Commerce. Its meetings will be attended by five members of the Economic Committee. It will submit its report directly to the Council of the League, at the same time forwarding a copy of its decisions to the Economic Committee and to the other technical organisations concerned.

34. The respective functions of the two bodies are not very clearly defined, and this lack of clarity is the result of a certain divergence of views. But the differences in the constitution and in the character of membership of the two bodies will probably tend in themselves to produce a differentiation of function, and will lead empirically to a solution of the difficulty which could not be entirely resolved in debate.

35. India has not hitherto been represented on the Economic Committee, but she was represented on the Preparatory Committee for the Economic Conference. We think that she has much to gain from representation, and a strong claim to it. That claim has been presented in the proper quarter, and Sir C. P. Ramaswami Ayyar referred to it in a speech in the Second Committee in which he pointed out not only the necessity for representing agricultural interests, but also the special difficulty of doing so owing to the comparative lack of organisation in agriculture. In the report which he presented to the Second Committee, and which was approved, M. Loucheur pointed out that the programme which the Economic Conference had drawn up for the League could not be successfully carried out unless agricultural interests were represented as widely as possible in the economic organisation of the League, and declared that it was the unanimous recommendation of the Second Committee that the Council should give very special attention to this important question of the representation of agriculture. There is further a need for the representation of Asia. We believe that the claim of India has since been recognised.

WORK OF THE HEALTH ORGANISATION.

36.* Sir C. P. Ramaswami Ayyar had indicated in his speech in the Assembly, of which we have already given a summary, that the Health activities of the League had a special interest for India. It was, therefore, a very appropriate compliment to India and to the Indian Delegation that he was elected *Rapporteur* for the general work of the Health Organisation. The report which he presented, first to the Health Committee and later to the Assembly, and his remarks in connection with it, will be reproduced in our final Report. It will suffice to say here that, in the resolution which he submitted to the Second Committee, and which was in turn submitted by the Second Committee to the Assembly and approved, the Indian point of view was explicitly recognised. In the report note was made of the tendency towards universality in the work of the Health Organisation and of the circumstance that the activities of the Singapore Bureau form the chief physical link between Eastern countries and the League Organisation. The report stated further that those countries, some of whom like India are large contributors to the general budget, appreciated this aspect of the League's work, as was evident from their close co-operation with it. It also referred to the interchange of Public Health officers which is being arranged to take place in India in the approaching winter, and of the possibility that the President of the Health Committee and the Director of the Health Section might be able to join the party. It referred also to the hope of the Government of India that the League's Malaria Commission might be able to visit India during the latter part of 1928. Reference was also made to the participation by Colonel Graham in the Health Committee's work and to the departmental Rabies Conference in which India was represented. It is particularly satisfactory to record that the necessity for an assurance of the permanence of the Singapore Bureau, and of its adequate financing, was emphasised.

37. The universality of this department of the League's activities was further marked this year by the initiation of health work in Latin America.

ALCOHOLISM.

38. At the Assembly of 1926 the delegations of Finland, Poland and Sweden submitted a proposal to the effect that the League of Nations should include the question of Alcoholism in the programme of its work. Consideration of this proposal was adjourned until the Eighth Assembly. Meanwhile, the Foreign Ministers of Finland, Poland and Sweden, with whom were also associated the Foreign Ministers of Belgium, Denmark and Czecho-Slovakia, had sent in a memorandum giving a more precise description of what they had in mind. This memorandum contained two definite proposals: (1) that the Assembly should request the Council to convene a conference with a view to the framing of a general International Convention regulating the smuggling of alcohol, and (2) that the Assembly should request the Council to appoint an Advisory Committee on Alcoholism, or a Sub-Committee of the Health Committee to deal with Alcoholism, which the various organs of the League might consult when studying questions connected with the problem and which might be generally available for information or investigations.

39. Although these were the specific proposals which the Committee had primarily to discuss, their presentation raised a general question of some importance, because, except in the isolated cases of the Mandated Territories and the Protection of Women and Children, the League had not hitherto had occasion to touch the subject of Alcoholism, and it was felt in various quarters that the general subject would be an unsuitable, and even dangerous, one for the League to take up.

40. As soon as the question was raised in the Committee the delegation responsible for its promotion was challenged as to its admissibility under the Articles of the Covenant. In reply paras. (c) and (f) of Article 23 were quoted, referring respectively to the Traffic in Opium and other Dangerous Drugs and to the Prevention and Control

of Disease. A considerable debate followed and the weight of opinion in the Committee was against acceptance of the proposal in the form in which it was presented. No general agreement was reached as to the admissibility of Alcoholism under the Covenant, but it seemed to be recognised by all that, whether or not a subject was admissible under the Covenant, it might be taken up by the League with the consent of all the States Members. Eventually the Finnish Delegate and those associated with him agreed not to pursue the proposals in their existing form, but declared their intention of bringing up the question of Alcoholism later in another form. Accordingly at one of the final sessions of the Assembly an application was made for the subject to be placed in a new form on the agenda of the Ninth Assembly.

41. As to the position taken up in the debate by the Indian Delegation, our instructions were to oppose the proposal for the creation of a new Advisory Body for Alcoholism, on the grounds that no case had been made out for the necessity of such a body, as there were other sources from which advice and information could be obtained, and that it was undesirable, from the general, and especially the financial, point of view, to sanction the creation of a new body except for imperative reasons. But we had been given discretion as to the attitude we should adopt towards the proposal for a conference on smuggling. Intervening in the debate, Sir Fazl-i-Husain stated that opinion in India in regard to Alcoholism was very strong and decidedly in favour of a policy of controlling the supply of liquor, while there was a strong body of public opinion actually in favour of prohibition. If prohibition had not yet been adopted in India it was chiefly for the reason that it would be so difficult to enforce it. He said that Alcoholism was treated in India as an evil, although it was not yet a very serious problem there. But, as elsewhere, it tended to spread with the growth of industrialism. In regard to the question whether Alcoholism should be dealt with as an international matter, he wished to reserve his opinion, but he recognised the existence in the Committee of a strong body of opinion against the proposals, and he found himself in complete agreement with those who maintained that in this debate the case for the proposals had not been made out. He felt that it would be wiser that those who supported the proposals should not pursue them further for the present, but should wait for a more appropriate occasion. He urged those in favour of them to realise that the result of a division might be prejudicial to the cause which they had at heart.

INTELLECTUAL CO-OPERATION.

42. This Organisation consists of (1) a League Committee formed on the initiative of the French to carry out a resolution of the First Assembly on "the educational influence which it is the duty of the Council to exert with a view to developing a liberal spirit of goodwill and worldwide co-operation," and (2) an Institute which was founded in Paris some years later, at the expense of the French Government, to act as the executive organ of the Committee. The Indian Delegation has always been sympathetic in its attitude to this Organisation, and India is represented on the Committee by Sir Jagadis Bose.

43. It would be impossible to describe briefly the numerous activities of a scientific, artistic and literary nature which the Organisation at present has in hand. The resolution which was adopted by the Assembly this year refers to projects for the creation of an international co-ordination service of information offices attached to libraries, for co-ordination between the organs of bibliography for the various sciences, for an international office for annual tables of constants and mathematical quantities, for a congress on popular arts, for an international agreement with regard to casts, and for an extension of the work of museums as a means of artistic education.

44. When the work of this Organisation was under discussion in the Second Committee, Sir Fazl-i-Husain made a speech in which he said it was impossible to overestimate this work in the scheme of League activities, for in his opinion the disarmament of ideas, which was in fact the breaking of the barriers of prejudice, was no less important than Disarmament strictly so called. He paid a tribute of appreciation and admiration to those who had served on the Committee and to the beneficial character, both for all Members of the League and for non-members as well, of the various schemes which were in hand. It seemed to him that the work might possibly gain in its character of universality if kindred fields of work in the Orient were included within its scope, and he mentioned Indian and Mesopotamian archaeology as being at least comparable with that of Europe. The term "international" was not limited in any way to the nations of Europe, and the evolution of international culture should afford every opportunity for the culture of the East to contribute towards it equally with that of the West. He finally appealed to the authorities of the Organisation to consider means of ensuring that what was best in the culture of the Orient should be reflected in the texture of the international culture of the future. His remarks were afterwards referred to with sympathy and approval by the delegates of Great Britain and Germany.

45. The Assembly, in the resolution which it adopted, expressed its appreciation of the increase in the number and activity of the national committees on Intellectual Co-operation, and stated that the regular co-operation between well-organised national committees and the International Committee was of ever-increasing utility to the work

of Intellectual Co-operation. The Assembly accordingly invited States which had not already done so to consider the possibility of providing the necessary funds to meet the expenses of their respective national committees. We understand that the League was informed in 1925, as regards India, that the Inter-University Board wished to be recognised as an institution with which the Intellectual Co-operation Committee might correspond with a view to the formation of a national committee in India. But, so far as we know, no progress has been made in this direction. We therefore venture to bring to notice suggestions which have been made by Sir Fazl-i-Husain, who, as already mentioned, acted as the Indian representative on this subject, and who is much impressed with the belief that India might derive great benefit from contact with this Organisation. His view is that, education being a transferred Provincial subject, there is need of a central agency to disseminate information to the various Provinces such as existed until a few years ago in the All-India Advisory Board on Education. He considers that there should be the same *liaison* between the intellectual activities of the Indian Provinces as the Intellectual Co-operation Organisation serves to create under the League between those of the different nations. Such an institution would enable India both to derive benefit from the international movement and to contribute to its success.

46. Two years ago there was set up, under the Organisation for Intellectual Co-operation, a Sub-Committee of Experts for the instruction of children and youth in the existence and aims of the League of Nations. Its Interim Report came before the Assembly of 1926, and it had since held further meetings and had drawn up a more comprehensive Report which was submitted to the Eighth Assembly. The Indian point of view has been represented on this Sub-Committee by Mr. S. N. Chaturvedi. The Interim Report has already been under the Government of India's consideration and we were informed that the Government of India were in general agreement with the recommendations, save that on several points modifications would be necessary to suit the present educational conditions of India. We were further informed that, as education was a Provincial subject, action would have to be taken by Local Governments responsible to their Legislatures and by Universities which are partially autonomous bodies. Unfortunately, this information reached us after the discussion of the subject in the Second Committee was finished. We venture to express the hope that the later and more comprehensive Report of the Sub-Committee will be examined in India with every desire to carry out its recommendations as far as possible, because we believe that the purpose of these recommendations must be considered of first class importance by all who recognise the necessity for consolidating the principles on which the League is founded. Incidentally, we would call attention to one recommendation of the Sub-Committee proposing the establishment of a corps of international lecturers, with special reference to countries where geographical or other consideration render League instruction particularly difficult. We understand that the circumstances of India were specially present to the Sub-Committee when this recommendation was proposed to it and adopted. For financial reasons consideration of this recommendation has been deferred.

CREATION OF AN EDUCATIONAL CINEMATOGRAPHICAL INSTITUTE.

47. The Italian Delegation submitted for the approval of the Assembly an offer on the part of the Italian Government to create at Rome an International Educational Cinematographical Institute. This Institute would be under the direction of the League of Nations, but would be carried on at the expense of the Italian Government, and established in a palace offered by that Government. The proposal was referred to the Second Committee, which dealt with it in connection with Intellectual Co-operation. Some anxiety was felt in regard to it by those who chiefly espouse the cause of the Institute of Intellectual Co-operation in Paris, which had already given some consideration to cinematography. It was obviously necessary to avoid any possibility of duplication or conflict between two League bodies, and it was further desirable to establish safeguards in regard to an institution which would be in a special relation to a particular national Government and would have as its object the guidance or inspiration, in the name of the League, of the policy of other Governments in a branch which is likely to be of increasing importance of such a subject as education. A Sub-Committee was appointed to reconcile the divergent opinions, and Sir Fazl-i-Husain served on this Sub-Committee. The Sub-Committee agreed upon a formula eventually approved by the Second Committee and by the Assembly, which acknowledged with gratitude the generous offer of the Italian Government, and left the decision as to the steps to be taken to the Council of the League, after consultation with the competent organisations, more particularly the International Committee on Intellectual Co-operation, and in agreement with the Italian Government. It is understood that the Second Committee will have a further opportunity of discussing the subject in detail next year.

48. It was in consequence of this discussion that the Hon'ble Mrs. Alfred Lyttelton, of the British Delegation, submitted to the Assembly a proposal that the general question of the relations between the League of Nations and institutes or bodies set up under its authority but not forming part of its organisation should be studied, and

that the principles which should govern their acceptance by the League should be laid down by the Council. The Second Committee examined this proposal, and on its recommendation the Assembly invited the Council to have the question studied, and asked that a report should be submitted to next year's Assembly.

ECONOMIC COMMITTEE.

49. This Committee has hitherto dealt with a number of matters of a severely technical character, and of somewhat second class importance. As a result of the resolution which we have already described in the Report of the Economic Conference, these activities are in future to be broadened, and the Committee will have a certain measure or responsibility in regard to the first class questions of economics, including, above all, the question of tariffs. During the last year the normal activities of the Committee have been subordinated to those connected with the Economic Conference, and some of the subjects under consideration, for instance, the abolition of import and export prohibitions and restrictions, became merged in the agenda of the Conference. It has, however, continued to do useful work, and one subject which requires to be mentioned here is the draft Protocol on the execution of foreign arbitral awards.

50. A Protocol on commercial arbitration was adopted at the Fourth Assembly recognising the universal validity as between Signatory States of clauses for the settlement of disputes by arbitration, which are voluntarily inserted in commercial contracts between the nationals of different countries. This Protocol has been ratified on behalf of Great Britain and various parts of the British Empire, and a considerable number of foreign countries, but not by India. On the whole, the number of accessions has been considered disappointing, and this is believed to be due to the absence of any arrangements for the execution of arbitral awards. The Economic Committee has further been engaged in drawing up provisions to supplement the Protocol in this respect, and the result of their labours came before the Eighth Assembly in the form of a draft supplementary Protocol for the execution of awards. The Second Committee, to whom this draft was referred, determined to refer it, together with the comments and observations of various Governments, to a Sub-Committee of legal experts for final preparation. A member of our Delegation, Sir Edward Chamier, served on this Sub-Committee, and his knowledge of the British and Indian system of law was of great value in ensuring that the protocol was not modified to meet the requirements of Continental law in such a manner as to make it unacceptable to countries in which the other system prevails. The new Convention (the Protocol form having been replaced by that of a Convention) is now open for signature, together with the original Instrument, and we understand that the Government of India will be prepared to consider adhesion to the two Instruments taken together. We understand that this Convention which, owing to its highly technical character, did not receive much general attention, may be ranked among the most solid achievements of the Eighth Assembly.

51. Sir Fazl-i-Husain spoke in the debate in the Second Committee on the work of the Economic Committee, and congratulated the Economic Committee on a good year's work in spite of the fact that its activities had been naturally overshadowed by the Economic Conference. With reference to the approaching conference for the abolition of import and export prohibitions and restrictions, he said that India welcomed this conference because, like other such conferences, it would contribute to the mutual understanding which followed a frank examination of circumstances. He stated that India was prepared to incur responsibilities which others were ready to incur, to the same extent and simultaneously, and that it was on reciprocity that a country in the position of India was bound to rely. With regard to the subject of the treatment of foreign nationals and enterprises he called attention to a defect in the draft resolution, and proposed an addition which was accepted. He stated the position of India with regard to the Protocol on commercial arbitration and expressed the view that the objection which had hitherto been taken to this Protocol on the part of India might be withdrawn when it and the Convention which was being drawn up on the execution of awards came to be considered together. On the subject of economic statistics he agreed that there could be no two opinions as to the desirability of unification, but he pointed out that the statistics which were desired might not be always available, and that their collection might be so costly that some States would not feel justified in incurring the requisite expenditure. He stated, finally, that the importance of economic barometers could not be over estimated. The economic barometer of the future would have to be one which was extremely sensitive and delicate, and which served for all countries, all climes and all continents. He thought that the work was one which in its universality was an ideal work for the League to accomplish.

FINANCIAL COMMITTEE.

52. This Committee has hitherto played a more prominent rôle than that of its twin organisation, the Economic Committee, but the result of the resolution adopted by the Assembly in regard to the Economic Conference will no doubt be to adjust this disparity. The principal tasks of the Financial Committee have been the restoration of the Austrian and Hungarian currencies and a number of other financial measures

of almost equal importance, such as those in connection with Danzig and Estonia, and the financial supervision of the settlement of Greek and Bulgarian refugees. Probably the League has not up to date made any contribution to the general cause of peace and prosperity greater than those which are covered by these headings. These important and valuable works have been mainly of interest to Europe, but another problem which has been under the consideration of the Financial Committee, viz., that of double taxation and fiscal evasion, is of more general application. The latter questions have now reached a stage at which four draft Conventions have been drawn up after long and exhaustive technical examination, and have been circulated to Governments for consideration.

53. The Committee has also made much progress with an interesting new scheme, which is believed to contain great possibilities. This is a scheme for the financial assistance of States which may be the victims of aggression. It arises from proposals submitted by the Finnish Delegation to the Preparatory Commission for the Disarmament Conference, and its importance lies in the fact that it is a concrete application of the principle of Article 16 of the Covenant, which provides in principle that Members of the League who are attacked by another State should receive economic and financial assistance from other Members. The project had only been circulated a short time before the Assembly, and many Governments, including the Government of India, had not had an opportunity of examining it and formulating their attitude. In these circumstances the Assembly could not do more than recommend it for further favourable consideration in the light of the views of Governments, when these have been collected. The British Delegation welcomed the scheme, and undertook to co-operate in it on the understanding that it formed part of a general settlement of the Disarmament problem. This scheme is referred to further in paragraph 59.

54. Sir Fazl-i-Husain spoke in the course of the debate in the Second Committee on the work of the Financial Committee. He referred to the valuable work which the Committee had done in enabling countries which were suffering from acute financial crises to stabilise their currency and to effect budget equilibrium, and to obtain through the credit and prestige of the League necessary loans at a lower rate of interest than would have been possible otherwise. Help given in this way was, he said, help to individual countries, and in countries outside Europe there was a section of the public which was disposed to emphasise the fact that the beneficent work of the League was limited to a certain tract in Europe, and was therefore not international in the larger sense of the term. As a rule it was only delegates from countries directly affected by the work of the Financial Committee who took part in this debate, and he felt obliged, as a delegate from a country which could not be included in this description, to meet the criticism which he had indicated. This work showed emphatically that the League was not a body of talkers, and it proved how effectively the League could deal with practical problems. He rejoiced in this work because it enabled the League to consolidate its position, and he was sure that if requests similar to those which had come from Austria, Hungary and other countries were to come from another continent they would receive the same sympathetic consideration as was extended to the European countries.

ORGANISATION FOR COMMUNICATIONS AND TRANSIT.

55. Apart from the general Conventions drawn up at the First and Second General Conferences of this Organisation at Barcelona and Geneva in regard to questions of navigation and maritime ports, etc., the activities of the Organisation have been almost entirely confined to Europe, including such questions as navigation of the Danube and the international railway services. The Assembly Resolution of 1926 had expressed a hope that the Third General Conference would consider the question of improving, as far as possible, technical *liaison* between the work of the Organisation and the specialised administrations and experts of non-European countries. The Third General Conference was held at Geneva just before the Eighth Assembly, and it adopted a new constitution which is designed to facilitate the representation and participation of distant countries.

56. We had the advantage of being represented in the Second Committee, when the report of the Third General Conference was under discussion, by Sir C. P. Ramaswami Ayyar, who had been the delegate of India at the Conference, and who was therefore acquainted with the work of the Organisation and with its plans for the future. In recognition of the fact that the Organisation was endeavouring to broaden its hitherto somewhat restricted activities, Sir C. P. Ramaswami Ayyar spoke in the Second Committee and said that the labours of the Third Conference had marked a great advance towards the mutual understanding of national and international problems. He noted the fact that States which were not Members of the League, such as the United States of America and Egypt, and also powerful organisations like the International Chamber of Commerce, had co-operated. He referred to the proposal which had been adopted in regard to the application of a system of identity certificates in lieu of national passports to persons who were without nationality or whose nationality could not be ascertained, and was glad that this scheme had been adopted in a form which tended to obviate the objections which had been felt by certain

countries. The decision on these proposals was in the form of a recommendation, and not of a resolution binding upon Governments. With regard to the proposals for the collection and exchange of information on communications he was glad that the Conference had dispelled the fears which were entertained at one time that a special organisation of considerable size charged with new work was going to be created. The scheme as it left the Conference had been restricted to the collection of information of a non-confidential character which was already at the disposal of Governments, and the provision of which would involve Governments in no additional expense. It may be noted, however, that when this scheme came before the Fourth Committee for approval of a supplementary estimate of the League budget, the Fourth Committee took the view, in which the Indian delegate concurred, that, desirable as the collection of this information might be, the work was of less urgency and necessity than other tasks for which supplementary estimates were demanded, and it therefore decided by a majority vote not to approve the supplementary estimate. It may be observed that, since the General Conference, and under the new constitution of the Organisation which was approved at the Conference, the interests of Asia in the work of the Organisation have been recognised by the appointment of a Siamese member to the Advisory and Technical Committee.

COMMITTEE III.— Arbitration, Security and Reduction of Armaments.

57. In addition to the material describing the preparatory work during the last 12 months for the Disarmament Conference, which included various studies of legal questions in regard to security arising out of the Covenant, the Third Committee had before it the Dutch proposal for the further study of the principles of arbitration, security and disarmament, and the Polish proposal for the prohibition of all wars of aggression, both of which had been referred to it by the Assembly. Further proposals, which will be referred to shortly, were introduced in the course of the discussions of the Committee by the French, German, Belgian, Norwegian and Finnish Delegations. The Committee had thus to deal with a bewildering, and to some extent conflicting, mass of material, and it was no small achievement to produce from this a series of propositions which were coherent, lucid and of great value. The Committee held 11 meetings, each of which lasted for several hours.

LORD LYTTON'S SPEECH.

58. Speaking towards the end of the general discussion in the Third Committee, Lord Lytton described the position of India. He said that India was less intimately concerned with the subject of the debate than other countries whose delegates had taken a prominent part in it. The army maintained in India for internal security and for the defence of its land frontiers had been considerably reduced in recent years. The task upon which it was engaged was different from that which most delegates had in mind when they spoke of war and the alternatives to war. The majority of the Members of the League were nations whose armaments existed to deal with a contingency which they believed to be remote and they hoped would never arise. India, on the contrary, had on her frontiers tribes whose traditions and instincts and habits of life were those of war; not war as a resort to force as a final measure after all the resources of diplomacy had been exhausted, but war in a more primitive sense as an almost daily occupation and as a profession of brigandage. With such neighbours the securities which the League had to offer could be of no value. He therefore addressed the Committee rather as a sincere believer in the value of the League than as a delegate of a country which derived any special advantage from the security offered by the League. He had been struck by the value which speakers seemed to attach to the re-affirmation of principles which had already been accepted not merely as ideals but as practical obligations. The danger was not that the principles of the League should be forgotten, but that they should come to be regarded as no more than formulæ or counsels of perfection which belonged to the region of ideals rather than to the practice of States. He said it was the business of the Committee not merely to dream of disarmament, or to re-affirm general principles, but to work out their practical application in a world of realities. Some were inclined to insist on the need for action, others on the difficulties of action; both lines of thought were helpful. It was the public opinion of the world which was the motive force of the League; some currents of opinion might appear to be opposed to their wishes or ends; they could not be ignored, and it was impossible to go against them, but by tacking either to the right or to the left it might be possible to make even those currents serve for progress towards the goal. It was a question in that Committee not of defining the goal, but of finding means of approaching it. If one means proved abortive, another must be sought. If one conference on disarmament failed, it was better to explore the causes of its failure than to bewail the fact. The task of the League was to improve, if possible, the machinery of arbitration, to make that method of settling disputes more attractive to the nations of the world, to increase, if possible, the security which could be afforded against aggression and so to make possible that progressive disarmament which every country desired for its well-being and development.

DEBATE IN COMMITTEE.

59. The French Delegation submitted a draft resolution recommending the conclusion of arbitration agreements between States in order to create the mutual confidence which was indispensable to the effective continuance of the work of the Preparatory Committee; secondly, requesting the Council to direct that Committee to study simultaneously with the preparation of a draft Convention for the limitation and reduction of armaments, measures calculated to give all States such guarantees of security as would enable them to reduce their armaments to the lowest possible figure in their proposals at the Conference; and thirdly, expressing the opinion that such measures would be found in special security agreements, and a modification of the provisions of the Protocol of 1924 in the direction of greater elasticity which would enable States to graduate their commitments according to the relations existing between themselves and other States. The German Delegation, with reference to the suggestion that the Preparatory Committee should not continue its work until further international security had been attained, observed that Germany and certain other States had already been disarmed, and urged that the Conference should be held on the basis of the existing conditions of security. Count Bernstorff proposed that the Preparatory Committee should be urged to complete its work as soon as possible and thus enable the Council to convene the Disarmament Conference before the next ordinary session of the Assembly. The Dutch, French and German proposals were referred to a Sub-Committee which threw them into the form of a single draft resolution. Two noticeable modifications were introduced. As drafted by the Sub-Committee the resolution provides for the appointment of a Special Committee to study measures relating to guarantees of security instead of leaving this to the Preparatory Committee and suggests that one of those measures might consist in invitations from the Council to the several States to inform it of the measures which they would be prepared to take to support the Council's decision in the event of a conflict breaking out in a given region. After some discussion as to the meaning of the second alteration, the draft of the Sub-Committee was in substance approved by the Third Committee. It was specially made clear that it was for the individual States in their replies to indicate what, if any, was the "given region" in which they would be prepared to take measures to support a decision of the Council. The Belgian Delegation drew attention to the difficulty of limiting air armaments without interfering with civil aviation and to the recommendations of the Preparatory Committee on this subject, and proposed a Resolution to the effect that it was desirable that the development of civil aviation should be directed solely towards economic ends, to the exclusion of military considerations. This proposal was approved. The Norwegian Delegation proposed the opening of an optional Convention for obligatory arbitration of disputes. After a reference to the First Committee it was decided that the subject should be considered by the Preparatory Committee on Disarmament. Lastly, the Third Committee accepted a resolution proposed by the Finnish Delegation on the subject of giving financial assistance to a State which might be the victim of aggression. Lord Lytton stated that he had had no instructions regarding this proposal, and made it clear that by voting for the resolution he would not commit the Government of India to any financial liability. It was stated in reply to Lord Lytton that in accepting the resolution the Assembly would only be authorising further study of the scheme.

60. At the close of its proceedings the Third Committee submitted to the Assembly a series of five resolutions dealing comprehensively with the Dutch, French, German, Norwegian, Belgian and Finnish proposals, also with reports of the Council regarding the methods to be employed in order to enforce the obligations of the Covenant as expeditiously as possible and the working of the organs of the League in times of emergency. The resolutions were in due course approved by the Assembly.

SUMMARY OF RESOLUTION ON DISARMAMENT.

61. The leading features of the fifth and most important of these resolutions, which deals with the Preparatory Committee for the Disarmament Conference, are briefly as follows: It records a conviction that the principal condition of success in the work of disarmament is "that every State should be sure of not having to provide unaided for its security by means of its own armaments, and should be able to rely also on the organised collective action of the League of Nations." It asks for the completion of the technical work of the Preparatory Committee to be hastened, and for the Conference on the limitation and reduction of armaments to be convened immediately this work has been completed. This meets the view of the German Delegation that disarmament is possible and should be proceeded with under existing conditions of security. At the same time, to meet the view that increased security must be found, the resolution requests that the Preparatory Committee should be authorised to create without delay a Committee whose duty would be to consider, on the lines indicated by the Preparatory Committee, "the measures capable of giving to States the guarantees of arbitration and security necessary to enable them to fix the level of their armaments at the lowest possible figures in an international disarmament agreement." The resolution goes on to indicate that these measures should be sought

in a variety of ways, and in enumerating these ways it advocates the principle of regional agreements, of which the Locarno Treaties are the type. These agreements are described as those "which the States Members of the League may conclude among themselves, irrespective of their obligations under the Covenant, with a view to making their commitments proportionate to the degree of solidarity of a geographical or other nature existing between themselves and other States." The resolution concludes with the idea to which we have already referred that the Council should invite the several States to inform it "of the measures which they would be prepared to take, irrespective of their obligations under the Covenant, to support the Council's decisions or recommendations in the event of a conflict breaking out in a given region."

PRIVATE MANUFACTURE OF ARMS AND PUBLICITY OF THE MANUFACTURE OF ARMS, AMMUNITION AND IMPLEMENTS OF WAR.

62. The Assembly passed a resolution on this subject last year and acting on that the Council referred the draft Convention which had been drawn up to a Special Committee with instructions to prepare a final draft which might serve as a basis for an International Conference. The Special Committee met in March 1927 and prepared a report which showed that there were fundamental differences of opinion between the members. Several speakers referred to the subject in the Third Committee. The Committee appeared to be unanimous in thinking that a solution of the problem was indispensable in connection with the question of disarmament. The majority seemed to be inclined to the view that the private manufacture of arms must be dealt with in a manner different from that provided for State manufacture. The Third Committee proposed, and the Assembly approved, a resolution re-affirming the great importance of the subject and suggesting a Convention providing for the superintendence of the private manufacture of arms and for publicity with regard to the manufacture of arms either by a State or by a private person or firm.

COMMITTEE IV.—Financial Questions.

THE LEAGUE BUDGET.

63. Those who remember the Report of the Indian Delegation at the last Assembly will be aware that the Assembly approved a Resolution of the Fourth Committee which was moved by Sir C. P. Ramaswami Ayyar, the Indian delegate on that Committee, to the effect that it was desirable, without putting obstacles in the way of the development of the League, to keep in view a maximum limit of expenditure with the object of securing that the contributions of individual States should not normally in future exceed their contributions for that year. It was naturally the object of the Indian Delegation this year to remind the Fourth Committee and the Assembly of this Resolution and to secure as far as possible that this principle was not disregarded.

64. In the budget which was presented to this year's Assembly, the total estimates for 1928 were placed at 24,879,622 francs, the real increase of expenditure on the basis of these estimates as compared with the budget approved for 1927 being about 100,000 francs. The estimates for the Secretariat and the Permanent Court of International Justice taken together showed a small decrease, and the increase of the total was caused by an increase in the estimates for the International Labour Organisation. It had been stated, on the authority of the Secretary-General, that although the gross expenditure contemplated for 1928 was greater than that for 1927, the net burden on each Member of the League would not in all probability be heavier in view of the distribution among the Members of the League of the greater part of the surplus for 1926. This statement was welcome to us as showing incidentally the effect of the Indian Delegation's Resolution last year, but we had to take into account (1) the normal practice of bringing Supplementary Estimates of considerable amounts before the Assembly, (2) the possible retirement of Spain and Brazil next year, and (3) the possibility of a considerable charge falling upon the League of Nations in two or three years' time in respect of the Singapore Bureau (a matter of great interest to India), when the Rockefeller contributions, by which the Bureau is chiefly supported at present, come to an end. The retirement of Spain and Brazil next year has still to be reckoned with. We have hopes that the financing of the Singapore Bureau for a considerable further period may be assured without heavy additional charges falling upon the League. In regard to Supplementary Estimates, a serious position was revealed. Supplementary Estimates of nearly 1,000,000 francs were submitted by the League authorities to the Supervisory Commission, and after pruning by the Supervisory Commission, were presented to the Fourth Committee to the amount of over 600,000 francs. These, it was understood, would increase the unit of contribution (the number of units for which India is responsible being 56) by well over 1,000 francs after all off-sets have been allowed for. The task of trying to effect reductions was, therefore, incumbent upon those delegations, including our own, who are actuated by motives of economy in practice as well as in principle.

65. The general debate on the budget was opened by the British delegate, Sir Edward Hilton Young, who was followed by Sir C. P. Ramaswami Ayyar. The latter said that his Resolution of last year had been put forward not only from purely economic considerations, but also to ensure that States that were far removed from the immediate scene of the labours of the League might be assured that its work was of as comprehensive and universal a character as possible. New commitments entered into should be considered with reference to what would happen not only during the year under review, but in future years. He also referred to the importance of applying a Resolution passed by a previous Assembly to the effect that special investigations made in the interest of one or more Members of the League should be paid for by those Members, and he urged that when States which were not Members of the League took part in Conferences organised by the League those States should be expected to pay their fair share of the expenses of such Conferences. He also referred to the necessity for regulating the publications of the League as far as possible on a sound commercial basis, and suggested that agents should be appointed in distant countries with a view to the dissemination of those publications. In the course of the subsequent debate on the details of the budget he raised various points of detail, as, for instance, in regard to the financing of the Singapore Bureau, in regard to the estimate presented for the settlement of disputes under the Transit Organisation, and as to the proposal to authorise the Transit Organisation to collect information on the subject of communications. He served as a member of a Sub-Committee to deal with a proposal for the formation of an administrative tribunal to settle any point which might arise in connection with the contracts under which members of the staff of the Secretariat and International Labour Office are serving. He was also selected to serve as one of the members of the Fourth Committee deputed to confer with members of the First Committee in regard to the proposals for the Codification of International Law.

66. Sir C. P. Ramaswami Ayyar's remarks are reflected, together with those of other delegates, in the Report of the Fourth Committee. This Report indicates that the expenditure of the League was not increasing in proportion to the new tasks entrusted to the League and to the increased work thereby involved for the various organs of the League. So far as figures are a reliable guide, the amount of work done by the staff has grown considerably in recent years. If the Assembly decided to entrust new tasks to the Secretariat, it was necessary either to increase the budget or to suspend temporarily some part of the normal duties of the Secretariat. The Report indicates a view that if the expenditure of the League is not to be developed indefinitely, the League will sooner or later be obliged to impose limits on requests for further expenditure, and it is suggested that the Assembly might at some time be invited to appoint a small body to deal with further proposals for expenditure, and to examine the order in which new tasks entrusted to the League should be undertaken. The Report also states that the Publications Department is being re-organised, with a view to placing its operations upon a more commercial basis, and that a considerably larger amount in respect of receipts from the sales of publications was anticipated in the near future.

SUPPLEMENTARY ESTIMATES AND FINANCIAL CONTROL.

67. On the subject of Supplementary Estimates a long and arduous debate took place. This debate revealed in the Fourth Committee a real and earnest desire for economy, although it may be open to question whether this desire was fully implemented. At the same time it indicated unmistakably the peculiar difficulties of financial control in the unique circumstances of the League, which arise from the absence of an executive authority with power to determine the priority in which proposals involving expenditure should be undertaken. The Indian Delegation, together with the British Delegation, followed the policy of supporting the authority of the Supervisory Commission, which is the most effective organ for financial control in the League's possession, and for the creation of which, it may be remembered, a past Indian Delegation was largely responsible. This Commission, of which Lord Meston is a member, scrutinises in the most thorough and efficient manner the financial provision for the measures which the League has in hand or decides to take in hand, but it lacks the ultimate power of selection among those measures. It is, in our view, very desirable, if not necessary, that in the near future the Assembly should find some means of satisfying the principle, which is an essential part of the financial procedure of national Governments. Serious warnings were expressed in the Fourth Committee as to the tendencies which are at present evident, and which, though they could not fairly at present be said to be out of control, may at any time lead to serious results unless the financial initiative can be somehow limited. It should not, however, be supposed that the sum total of League expenditure at present is anything but moderate, having regard to the importance and responsibilities of the League.

68. Our remarks may be illustrated by the discussions which took place on two supplementary demands, one for a sum to enable the Transit Section to collect information on the subject of communications, and the other for the expenses of the work of codifying international law. The first arose from a recommendation of the Third General Conference on Transit and Communications, which had been approved by the Second Committee, and a demand had been presented for 40,000 francs to proceed with

the work during 1928. The debate on this demand ranged as much over questions of principle relating to the status and authority of the Supervisory Commission, as over the actual desirability of the proposed services, which few delegates desired to question. Sir C. P. Ramaswami Ayyar said that although he had as a delegate at the Third General Conference and as a Member of the Second Committee supported the project for which this demand was made, he felt obliged, in view of the gravity of the financial situation, and of the necessity for making some selection among the services for which supplementary credits were asked, to vote against the credit in the Fourth Committee. Eventually the estimate was rejected by a majority vote, but after further negotiations with the Second Committee, it was agreed that the Secretariat should continue the work already begun, so far as might be possible without the additional credit, and a hope was expressed that the credit in question might appear in the Budget of 1929.

69. In the second case the Supervisory Commission had accepted a supplementary estimate for 80,000 francs for the preparatory work necessary to enable International Conference to be held in 1929 to attempt the codification of international law on certain subjects (see paragraph 26 above), but, in order to avoid serious additional expenditure, it had proposed to compensate for the admission of the supplementary item by deleting a provision of 75,000 francs in the original budget to enable the Committee of Experts on this subject to continue its work. The view of the Supervisory Commission was supported by a majority vote of the Fourth Committee, but it was agreed that any part of the sum allotted for the preparation for the Conference which might not actually be found to be necessary for that purpose might be used for a further meeting of the Committee of Experts. In spite of this decision, and in spite of the fact that the First Committee, to whom the decision was communicated, had raised no objection, the matter was brought up again in the Assembly, where the recommendation of the Fourth Committee was rejected by a small majority. The Fourth Committee was asked to consider the matter again with a view to reaching the necessary unanimity, and a debate took place which lasted until after midnight. In the course of this debate, Sir Fazl-i-Husain said he thought no one had disputed the fact that the work of the Committee of Experts was of great value to the League of Nations. The former decision of the Fourth Committee did not involve the interruption of this work, and it was only a question of the pace at which it would proceed. The South American countries claimed that this credit should not be refused, on the ground that the work of codifying international law was one of the few activities of the League in which they were directly interested, but he asked that the Committee should take an equal interest in the position of certain other countries who paid their annual contribution, but perhaps derived even less direct benefit from the work of the League than the South American countries. Notwithstanding the fact that the direct benefit to them of the work of the League was comparatively small, these other countries readily voted various credits for humanitarian work which did not benefit them; but he said that it was important that the Committee should realise that the continual increase in the unit of contribution might reach the point of becoming intolerable, and each addition would possibly prove to be the last straw which broke the camel's back. After Sir Fazl-i-Husain had spoken, a solution was proposed by which, although the budget provision was not increased, those who wished to ensure a further meeting of the Committee of Experts in 1928 were given reason to expect that sufficient funds would be found by transfer from another head of the budget if necessary. This solution was accepted by the Fourth Committee and later by the Assembly with the necessary unanimity.

70. The debate on these two matters attracted very considerable notice, and we believe that, apart from the decisions reached on the particular issues, they will exercise a salutary influence on the general tendency of the financial policy of the League. The result of the debate on Supplementary Estimates was to raise the total budget to 25,333,817 francs. The net contribution of India for 1928 will be about £51,400 as compared with about £50,150 for 1927.

ALLOCATION OF EXPENSES.

80. Two years ago a provincial scale was adopted for the allocation of the expenses of the League between the States Members, which was to last for three years, and was due to come up for further consideration at the Assembly of 1928. The budget for 1928 included an estimate to provide for a meeting this winter of the Standing Committee on Allocation of Expenses, so that new proposals might be brought before the next Assembly. When this estimate came before the Fourth Committee, M. Reveillaud, the French delegate, who is Chairman of the Allocation Committee, said that, after considering the economic conditions of the various countries, he had come to the conclusion that the general economic situation of the world would not be sufficiently stable, at any rate for some years to come, to permit of any satisfactory permanent settlement of this question in the immediate future. In these circumstances, he thought that there would be no object in holding a session of the Committee as had been intended, and accordingly he proposed a reduction of the estimate. The claims of India for a reduction of her share of the expenditure of the League have

always been strongly pressed in the past. As it had not been anticipated that the matter would be raised this year, the Indian Delegation had no definite instructions and were not in a position to accept any arrangement under which the present scale would continue in force for a number of years. There was obviously nothing to be gained by insisting on a meeting of the Allocation Committee being held during the present winter, as the Fourth Committee was clearly impressed with M. Reveillaud's arguments, which were, in fact, of a convincing nature. Sir C. P. Ramaswami Ayyar, on behalf of the Indian Delegation, confined himself to securing an understanding that the acceptance of the proposal to reduce the estimate did not restrict the liberty of the next Assembly to discuss the matter again.

CONSTRUCTION OF NEW LEAGUE OF NATIONS BUILDINGS.

81. For the earlier history of this matter reference is invited to the Report of the Indian Delegation to the Special Assembly of 1926. This Assembly had approved proposals for the construction of a new Assembly Hall and of new offices for the Secretariat and for the purchase of the building land. It had adopted a provisional estimate of nearly 17,000,000 francs, including a sum of 4,000,000 francs which is the guaranteed price for the sale of the building at present occupied by the Secretariat. A competition of architects has since been held, and as many as 377 designs were submitted. The Jury of Architects which examined these plans decided unanimously that the results of the competition did not justify it in recommending any one of the plans for execution. They decided to dispose of the prize money by giving nine equal prizes to the nine competitors whose designs appeared to them to be the best, and further smaller sums to 18 further designs, arranged in two classes of nine each, which were considered worthy of honourable mention. When the report of the Jury of Architects came before the Assembly a Committee of five members was appointed to consider the question and report back to the Assembly. This Committee reported that, after allowing for the purchase of land and other general expenses, and for interest on the cash balance actually in the League's possession, and for the guaranteed sale price of the present Secretariat building, there would be a sum of 15,400,000 francs available for building purposes. They thought that the sum available would not be sufficient to ensure that the new buildings would, without being actually luxurious, be satisfactory from the aesthetic as well as from the practical point of view, and they believed that it was necessary to contemplate an increase of the credit allotted to approximately 19,500,000 francs. On their recommendation the Assembly approved in principle that the sum to be spent on the new buildings should be increased to approximately this figure, on the understanding that the exact amount of the supplementary credit necessary would be submitted to the Assembly at its next session. The Committee further expressed the view that the ultimate choice of a plan should be made from among those which received the nine equal prizes, and it recommended that a small Committee should be appointed with full powers to choose, with any changes that might be necessary, the plan which in their opinion most nearly satisfied requirements. After some discussion in the Assembly these recommendations were approved, and the members who had served on the Committee which had made these recommendations were appointed to constitute the Committee which is to continue to deal with the question.

82. Before leaving this subject we ought to mention the munificent gift of \$2,000,000 from Mr. John D. Rockefeller, Jr., for the construction and endowment of a new League of Nations Library. The Assembly naturally confirmed with gratitude the acceptance by the Council of this gift, the purpose of which can be adequately carried out with the certainty that no liabilities will in future be imposed on the Members of the League on account of its acceptance. This gift will render possible the formation and maintenance of a library on a much more extended scale than that which at present exists in the Secretariat or could otherwise be contemplated. It will greatly improve the facilities, of which there is an increasing need, for research work and for students.

COMMITTEE V.—Social and Humanitarian Questions.

CHILD WELFARE.

83. Indian Delegations of the past two years have been somewhat concerned with the appearance of a tendency on the part of the Child Welfare Committee to take too wide a view of its proper sphere of operations. In 1925 the Maharaja of Patiala, and in 1926 the Maharaja of Kapurthala, considered it desirable to express apprehension as to the consequences that might result from any invasion of areas of purely domestic concern and from a policy of trying to apply indiscriminately ideas or criteria which for social or even religious reasons might not be universally applicable. This tendency had been noticed also by other observers, and the Committee had been advised by the Council of the League to "endeavour so to narrow the field of each particular enquiry

as to produce results of practical value to Governments." At the Assembly of 1926, the Fifth Committee, in its report on this subject, appreciated the fact that practical considerations must sometimes limit the scope of international co-operation in this field, and they called attention to the caution expressed by the Maharaja of Kapurthala. During the last 12 months the Child Welfare Committee has appointed an Agenda Sub-Committee for the purpose of controlling the subjects treated, and this Sub-Committee may be considered to have done good work, although the necessity for confining activities in this field to objects of international concern still requires to be watched. As the warnings previously expressed appeared to have had a salutary effect, and as the Report of the Committee, which was presented to this year's Assembly, contained nothing which called for criticism, the Indian Delegation was able to abstain from taking part in the discussion.

TRAFFIC IN WOMEN AND CHILDREN.

84. The most notable subject in this year's discussion was the report of the special body of experts which has been enquiring into this traffic. Only the first part of this report has been published, the second part having been communicated confidentially to the Governments concerned—of which the Government of India is not one—for such observations as they may wish to make. These observations are to be received shortly, and on their receipt the body of experts will meet again to consider them, after which the question will come before the Council of the League for a decision as to further action. The resolution adopted by the Assembly called attention to the problem of the relationship which, according to the conclusions of the special body of experts, exists between the licensed house and the traffic in women, and expressed a hope that the appropriate Committees would examine the question of the desirability of recommending to all Governments the abolition of the system of the licensed house.

85. The special body of experts has so far confined itself to America, Europe and the Near East. It has, however, reported that information in its possession tends to show that the international traffic is also met with in the Far East, and it acknowledges that, owing to differences of religion and custom, the problem in the Far East appears in a different aspect. The question of authorising the special body of experts to extend its enquiries beyond the areas already investigated has thus not yet arisen; but it may do so when their present task has been completed. In the circumstances, no question affecting India arose this year.

THE PRODUCTION OF OPIUM IN PERSIA.

86. At the Assembly of 1925 attention had been called to the absence of effective control at Persian ports over exports of opium, and the final Act of the Second International Opium Conference contained a recommendation that a Commission of Enquiry should be appointed to visit certain opium-producing countries. Accordingly, in pursuance of a recommendation of the Assembly of 1925, a Commission was appointed to be sent to Persia to study the existing situation with regard to the cultivation of the poppy and the replacement of a proportion of this cultivation with other crops. This Commission reported at the end of 1926, and its report came before the Assembly. The Commission considered that the Persian Government should make it an essential part of its programme to take definite steps looking to, and preparatory for, a gradual and systematic reduction of cultivation to begin three years from the promulgation of the programme. It believed that, after the preparatory period of three years, the Persian Government might safely undertake a reduction of 10 per cent. each year in the acreage allotted to the cultivation of the poppy, and it made a number of practical recommendations designed to facilitate this programme. The Persian Government has expressed its willingness to attempt to carry out the recommendations of the Commission, with some modification, but in doing so it has declared that the success of its programme will in large measure depend on its obtaining liberty of action in tariff affairs, and on the removal of the restrictive tariffs on Persian products which must be substituted for opium. The Assembly expressed its appreciation of the goodwill shown by the Persian Government, and hoped that the Governments concerned would give their earnest and favourable attention to the tariff conditions referred to by the Persian Government.

TRAFFIC IN OPIUM AND OTHER DANGEROUS DRUGS.

87. The Government of India have a representative on the Advisory Committee dealing with this subject in the person of Sir John Campbell, I.C.S. (retired), who is the present Chairman of the Committee. The work of the Committee in recent years has been principally concerned with the illicit traffic in manufactured drugs, *viz.*, morphia and other derivatives of opium and cocaine. In these circumstances no controversial question in regard to opium arose.

88. The Report of the Advisory Committee called special attention to the gravity of the situation which exists in regard to the illicit traffic in drugs and the urgent necessity for action in the direction of control. The hope of adequate control resides chiefly in the bringing into operation of the Geneva Convention of 1925, for which a sufficient number of ratifications has not yet been received. The prospect of the Convention coming into force has not improved recently. The Report of the Advisory Committee, although approved without criticism, was received in the Fifth Committee with less attention than might have been expected. It appeared that there would be some advantage in directing attention to the necessity for action as publicly and emphatically as possible, and accordingly, when the Report of the Fifth Committee on this subject was presented to the Assembly, Lord Lytton made a speech.

89. He said that India was very much alive to the gravity of the drug problem, and looked to the League for help in regard to it. He wished the Assembly to realise the enormous extent of the illicit traffic in drugs, and the grave human import of that trade as revealed in the Report of the Advisory Committee. India, for instance, imported a small amount of cocaine for medical purposes, but the illicit traffic in cocaine in India was stated by the Committee to be as much as 40 times the legitimate imports, in spite of vigorous and efficient administrative efforts to suppress it. The figures of the illicit traffic quoted by the Committee were startling, but even so, they scarcely conveyed their full human import. He went on to picture to the Assembly the intensity of human misery for which the drug evil was responsible, and he asked how, in face of such facts, there were Governments with the power to stop it which allowed it to continue. Yet 54 nations were parties to the Hague Convention which included as an obligation accepted by all the signatories a provision to enact laws and regulations to limit exclusively to medical and legitimate purposes the manufacture, sale and use of drugs, and with further provision for co-operation between Governments. The drug problem was not one of those which could not be solved, and which must be tolerated because no remedy could be found. On the contrary, it was one which all the nations of the world had recognised, had discussed, and had pledged themselves to remedy. It was one of the evils which the League of Nations was competent to remove, and the removal of which was one of the triumphant achievements which still await the League. The individual efforts of no single nation could stem the tide, but by the combination of all nations it could be stemmed swiftly and effectively. The States Members of the League were already bound by an International Convention to do this, but it still remained for public opinion in some countries to insist on fulfilment of that obligation. There were probably not more than 30 drug factories in the world, and if each Government concerned put a ring fence round these factories the illicit traffic would cease. The Convention of 1925 might not be perfect, but it represented the furthest point yet reached and was the most effective weapon available. He appealed to delegates on their return to their various countries to create an opinion which would insist upon action.

PERMANENT CENTRAL BOARD TO BE SET UP UNDER THE OPIUM CONVENTION OF 1925.

90. In anticipation of the Convention receiving a sufficient number of ratifications and coming into force, the Secretary-General had submitted estimates for the necessary expenditure being met from League funds. These estimates came up for consideration in the first instance in the Fourth Committee, but the question was referred to the Fifth Committee for their opinion. There was some question whether the expenses of the Board should be borne by the League at all, but it seemed to be the general view that such a course would be reasonable and desirable. Sir Fazl-i-Husain associated himself with this view in the Fourth Committee. The questions which received most attention were whether the services of the Board should be remunerated at all, seeing that, practically without exception, appointments to the numerous advisory bodies which serve the League carry no remuneration, and whether, if the members of the Central Board were to receive remuneration, the amount proposed, *viz.*, 5,000 Swiss francs a year, was adequate. After a long discussion the Fifth Committee expressed the opinion that it would be well if the Council could secure the gratuitous services of persons of the qualifications contemplated, and thus carry on the fine tradition of gratuitous service. But if this should prove impossible, as several members apprehended, the Fifth Committee was not prepared to say that the provisional estimate was sufficient. After further discussion in the Fourth Committee, it was eventually decided, on the recommendation of the Supervisory Commission, not to make any financial provision for 1928, on the ground that there seemed insufficient prospect of the money being actually required, owing to the delay in the ratification of the Convention on which the appointment of the Central Board depended. There are still certain countries, especially Italy, that are not satisfied that the creation of the Central Board will be the best means of regulating the Convention when it comes into force.

COMMITTEE VI.—Political Questions.

SLAVERY CONVENTION.

91. The conclusion of this Convention was one of the principal achievements of the Assembly of 1926. The Convention provided for the submission of annual Progress

Reports which will enable the Assembly to watch the execution of the Convention. The reports which had been submitted by the Government of India in regard to recent developments in Burma and Kalat were perhaps the most striking feature of the material before the Committee. The Convention has so far only been ratified or acceded to by 14 countries, of which India is one. According to statements made in the Sixth Committee, six more countries hope soon to be in a position to ratify.

92. Several points required to be brought to the notice of the Committee in regard to India, and the Maharaja of Kapurthala accordingly made a speech. In the first place he made a statement intended to correct a misunderstanding for which the Indian Delegation of 1926 had been inadvertently responsible, *viz.*, that the recent liberation of slaves in the Kingdom of Nepal had been influenced by the League. He stated that the Nepalese authorities had announced their intention of liberating slaves before they could have known that the League was taking the question in hand, and he called special attention to features of the work carried out in Nepal which might be studied with profit by other countries who were faced with the same problem. He then referred briefly to the events of the last year in Kalat and Burma, and he supplied information more recent than that which had already been furnished to the League in regard to the success which had attended the measures taken in Kalat. He also referred to the fact that, when the Convention was signed, it had been necessary for constitutional reasons to make a reservation excluding Indian States and to the undertaking then given that the Government of India would not fail to bring to the notice of the Rulers of States the provisions which had been accepted for British India. He was able to announce that the Government of India had now fulfilled the undertaking, and he expressed confidence that the Ruling Princes would devote themselves to the removal of such vestiges, if any, of conditions akin to slavery as might still survive.

SYSTEM OF SINGLE TRANSFERABLE VOTE FOR THE ELECTION OF NON-PERMANENT MEMBERS OF THE COUNCIL.

93. The single transferable vote system means that the voter arranges the candidates for whom he wishes to vote in order of preference. At first only first votes are counted, but afterwards all first votes which are not going to be effective, *i.e.*, those given to candidates who have already received the minimum number of votes necessary for election and those given to candidates who received so few as to have no chance of election, are disregarded, and the second votes take their place, and so on until a sufficient number of candidates have received the minimum number of votes required for election. The idea was first suggested by Lord Cecil in the course of the discussions relating to the constitution of the Council which took place in 1926, and it was subsequently taken up by the Norwegian Government, by whose delegate it was presented to the Assembly this year. The Norwegian Government described their proposal as designed to allow electors to exercise a free and independent choice when voting, and as ensuring at the same time their equitable representation. They pointed out that while, in the case of ordinary Parliamentary elections, there was prevalent the question of creating a stable majority as the basis of a strong Government, in the case of the Council of the League it was universally agreed that the Council ought always to embrace representatives of different ideas, different interests and even different races. The supporters of the proposal thought that the single transferable vote was the system best calculated to give this result.

94. The Government of India had expressed themselves in favour of the single transferable vote system, as they considered that minorities had the best opportunity of making themselves felt under this system. It was, therefore, best calculated to give due consideration to the main geographical divisions of the world, the great ethnical groups, the different religious traditions, the varying types of civilisation and the chief sources of wealth, these expressions being contained in a resolution of a former Assembly to which great significance is attached by Eastern countries. We were, therefore, instructed to support the Norwegian Delegation, and Sir B. K. Mullick spoke accordingly. He expressed the opinion of the Government of India and said that though a good deal had been said about the practical difficulties of putting the system into operation, these difficulties did not seem to him to be very serious. The electorate in the Assembly would be far more competent and far smaller than the average electorate in a general election in a European State, and it would not be affected by the violent storms of local feeling which were apt to sweep over a country on such occasions.

95. It was at one time believed that owing to the unfavourable attitude of certain Great Powers, Great Britain and France in particular, there would be little support for the Norwegian proposal. An unexpected volume of support was, however, given, and India was not the only member of the Empire to place herself in opposition to Great Britain. In the end the view prevailed that, as the present method of election to the Council had been introduced only last year, it should be given a chance of being tested before any further changes were made.

Concluding Remarks.

96. We have already anticipated to some extent our general conclusions on the outstanding features of the Eighth Assembly. The importance of the session was emphasised by the fact that leading statesmen, such as M. Briand and Herr Stresemann, who, on previous occasions, have been content to resign the leadership of their delegations into other hands, remained in Geneva on this occasion until the end of the Assembly. Fundamental questions were examined with an unusual degree of frankness and with a sense of reality. Those who may have thought that the idealism of the League would wither in such an atmosphere appear to have been wrong. The League has, in our view, gained much in strength from the fact that differences were more clearly defined and are now better understood. There is less uncertainty, for instance, as to the sincerity of the British Empire towards the League, and as the attitude of the British Empire may be claimed to be the greatest single factor in League politics a clear appreciation of it is of vital importance. At the same time it is clearly realised that the British Empire, in view of its responsibilities and commitments all over the world, cannot at present go beyond a certain point in the policy of altruism for the sake of international ideals, and though this fact necessarily disappoints the hopes and aspirations of many Members of the League it has been accepted with resignation and without bitterness. The events of the session might have shaken seriously an institution less securely founded than the League has shown itself to be.

97. When the Assembly opened there were many who thought that a deadlock had been reached in the great questions of Arbitration, Security and Disarmament, and that the proceedings of the Preparatory Committee for the Disarmament Conference would be adjourned *sine die*. As a result of the debates the Preparatory Committee will continue its work, both on the existing basis of security and in the more favourable circumstances which may be created by an improvement in the conditions of security of lines which have been indicated. At least the study of this question is still alive, when there was a serious possibility that it might not be so. At the same time the League is launched upon a policy of international reconciliation and co-operation in the economic sphere, which, in the opinion of many authorities, may lead to a realisation of the ideals of the League as effectively as the more direct avenues of approach.

98. We believe that the position of India in the League is being steadily strengthened, and that the claims of India and other non-European countries to greater facilities for effective participation are being received with increasing sympathy as the preoccupation of the League with the acute and urgent problems created in Europe as an aftermath of the war is passing away. The acceptance of new tasks depends upon the initiative of States Members, and so far the initiative has come almost entirely from European countries. We can understand the view current in India that the activities of the League contain little in which India can interest herself or from which she can benefit. But we think that a modification of this view would be justified by a candid examination of the facts. It would, in our view, be a matter of great regret if the opportunities offered to India by the League towards the development of her status among the nations of the world were imperfectly realised through ignorance or misunderstanding of the facts. For this reason, and because representation needs to be based upon an informed and enlightened public opinion, we feel that great importance should be attached to publicity.
